Get to Know Me

I am a neurologist with specialty training in epilepsy and clinical neurophysiology. I treat patients with brain tumors who develop seizures as a result of their tumor and patients with neurological complications of systemic cancer.

As an epileptologist, I provide continuity of care for patients with seizures in conjunction with my colleagues in neuro-oncology, neurosurgery, and radiation oncology. In addition to these clinical responsibilities, I head the electroencephalography (EEG) and intraoperative neurophysiologic monitoring (IOM) services at Memorial Sloan Kettering Cancer Center. I interpret EEG studies, which assist in the diagnosis and treatment of seizures, and I perform and interpret intraoperative neurophysiologic monitoring, a technique used to prevent neural injury during brain and spine surgery.

What I Do at MSK

I'm a neurologist, which is a doctor with special training in the brain, spinal cord, nerves, and muscles.

- Vice Chair for Clinical Affairs, Department of Neurology
- Co-Director, Neuro Advanced Care Unit

Areas of Expertise

Conditions I Treat

- Epilepsy
- Neurologic complications of cancer

My Specialties

- Clinical neurophysiology
- Neurology

Education & Honors

Clinical Trials

Find a Clinical Trial for You

Memorial Sloan Kettering's doctors and scientists are constantly developing new treatments for cancer. MSK is typically running hundreds of clinical trials at a given time.

You may be able to participate in a clinical trial even if you are new to MSK. Search our online directory to find trial information and see more about who can participate.

Disclosures

Members of the MSK Community often work with pharmaceutical, device, biotechnology, and life sciences companies, and other organizations outside of MSK, to find safe and effective cancer treatments, to improve patient care, and to educate the health care community. These activities outside of MSK further our mission, provide productive collaborations, and promote the practical application of scientific discoveries.

MSK requires doctors, faculty members, and leaders to report ("disclose") the relationships and

financial interests they have with external entities. As a commitment to transparency with our community, we make that information available to the public. Not all disclosed interests and relationships present conflicts of interest. MSK reviews all disclosed interests and relationships to assess whether a conflict of interest exists and whether formal COI management is needed.

Edward K. Avila discloses the following relationships and financial interests:

No disclosures meeting criteria for time period

If you're a patient at MSK and would like more information about your doctor's external relationships, please talk with your doctor.

The information published here is a complement to other publicly reported data and is for a specific annual disclosure period. There may be differences between information on this and other public sites as a result of different reporting periods and/or the various ways relationships and financial interests are categorized by organizations that publish such data.

This page and data include information for a specific MSK annual disclosure period (January 1, 2024 through disclosure submission in spring 2025). This data reflects interests that may or may not still exist. This data is updated annually.

Learn more about MSK's COI policies [here](#) . For questions regarding MSK's COI-related policies and procedures, email MSK's Compliance Office at ecoi@mskcc.org .
