About Me

What I Do at MSK

- Associate Attending Physician

Get To Know Me

I am a board-certified medical oncologist who specializes in caring for patients with lung cancer.

I am part of a team of physicians from multiple disciplines — including thoracic surgery, radiation oncology, pathology, pulmonology, and interventional radiology — who meet weekly and collaborate to determine the optimal treatment plan for our patients. As part of our suite of treatment options, my colleagues and I run and participate in a multitude of clinical trials, all of which are available to patients who qualify and wish to participate. These trials range from therapeutic trials evaluating new treatment approaches to translational trials that help us learn more about lung cancer.
