Get to Know Me

I am a board-certified medical oncologist who specializes in treating men with [prostate cancer](#) , particularly those with metastatic disease (disease that has spread to distant organs) or those who are at a high risk for developing metastatic disease. I am the Prostate Cancer Section Head, which means I lead a group of experts at Memorial Sloan Kettering Cancer Center (MSK) who are dedicated to researching and treating this disease.

Much of my research focuses on drugs that can deliver radioactive molecules targeted specifically to prostate cancer cells or to the distant areas where the cancer spreads. These drugs can be used alone or in combination with other anti-cancer treatments. This research represents a team effort between medical oncologists, nuclear medicine doctors, and radiologists to bring these novel and exciting drugs to the people with prostate cancer who need them.

This provider is part of a team that was ranked [#1 in the nation for Urology Cancer Care](#) this year by *U.S. News & World Report*.

What I Do at MSK

I'm a genitourinary (GU) medical oncologist, which is a cancer doctor who specializes in genitourinary (jeh-nih-toh-YOOR-ih-nayr-ee) cancers. This includes bladder, kidney, penis, prostate, and testicular cancers.

Disclosures

Members of the MSK Community often work with pharmaceutical, device, biotechnology, and life sciences companies, and other organizations outside of MSK, to find safe and effective cancer treatments, to improve patient care, and to educate the health care community. These activities outside of MSK further our mission, provide productive collaborations, and promote the practical application of scientific discoveries.

MSK requires doctors, faculty members, and leaders to report ("disclose") the relationships and financial interests they have with external entities. As a commitment to transparency with our

community, we make that information available to the public. Not all disclosed interests and relationships present conflicts of interest. MSK reviews all disclosed interests and relationships to assess whether a conflict of interest exists and whether formal COI management is needed.
