# About Me

## What I Do at MSK

- Clinical Director, Thoracic Oncology Service

## Get To Know Me

I am a medical oncologist specializing in the care of patients with lung cancer.

My research interest lies in developing new therapies for patients with squamous cell carcinomas of the lung. Treatment options for patients with this type of lung cancer have lagged behind those for patients with lung adenocarcinomas. We are, however, beginning to unravel the molecular complexity of this disease, which we hope will herald in a new era of personalized medicine for our patients.
