## About Me

Ross L. Levine

## What I Do at MSK

- Laurence Joseph Dineen Chair in Leukemia Research with Special Emphasis on Leukemia in Children and Young People
- Senior Vice President, Memorial Hospital, Translational Research

## Get To Know Me

I am a physician-scientist focused on researching and treating blood and bone marrow cancers, including acute myeloid leukemia and the chronic myeloproliferative neoplasms polycythemia vera, essential thrombocythosis, and primary myelofibrosis.

Taking care of people with [leukemia](#) during my residency and fellowship inspired my interest in the disease. I saw that while our treatments could be quite effective the first go-round, many leukemia patients relapse. That got me thinking about how we could better understand why leukemia develops and how we could create new, targeted [treatments](#) to improve outcomes.

## Disclosures

Doctors and faculty members often work with pharmaceutical, device, biotechnology, and life sciences companies, and other organizations outside of MSK, to find safe and effective cancer treatments, to improve patient care, and to educate the health care community.

MSK requires doctors and faculty members to report (“disclose”) the relationships and financial interests they have with external entities. As a commitment to transparency with our community, we make that information available to the public.
