FOR THE MEDIA

- Deliver broad training in the evaluation and care of children and young adults with blood disorders and cancer
- Develop highly qualified, productive investigators in clinical and/or laboratory-based hematological and cancer research.

Program Directors

- [Catherine E. McGuinn, MD](#)
- [Kavitha Ramaswamy, MD](#)
- [Andrew Harris, MD](#)

Program Overview:

- Three-year Accreditation Council on Graduate Medical Education (ACGME)-accredited fellowship
- Combined training program: Fellows are appointed as members of both institutions (MSK and NYPH-WC)
- Clinical rotations in the first year consist of a mix of inpatient services on oncology, hematology-oncology, and transplant and cellular therapy mixed with outpatient experience at MSK and NYPH-WC
- The second and third years of fellowship are protected time for research, with ongoing responsibilities in the outpatient continuity clinic to maintain clinical skills
- Class of six fellows per year
