## Current Research Interests

Dr. Helena Furberg is a molecular cancer epidemiologist dedicated to identifying modifiable exposures that are associated with urologic cancer risk and prognosis. She has established large-scale cohort studies that investigate how biochemically-verified nicotine exposure impacts recurrence risk among non-muscle invasive bladder cancer patients (funded through the American Cancer Society), and how body composition features influence clinical outcomes among clear cell renal cell cancer patients (funded by the National Cancer Institute). She actively engages in collaborations with physician-scientists to investigate the molecular underpinnings of the obesity paradox in kidney cancer, as well as identifying transcriptomic subtypes of bladder cancer. Dr. Furberg received her master's and PhD in Epidemiology from the University of North Carolina at Chapel Hill and completed post-doctoral fellowships in Genetics and in Molecular Epidemiology at UNC and Mt. Sinai Cancer Center, respectively.

## Publications

Selected peer-reviewed publications:

Olsson LT, Eberle CE, Petruzella S, Robinson WR, Furberg H. A comparison of analytic approaches for investigating the obesity paradox in kidney cancer. *Cancer Causes Control*. 2023 Apr;34(4):361-370. doi: 10.1007/s10552-023-01670-6. Epub 2023 Feb 14. PMID: 36786871; PMCID: PMC10448500.

Ged Y, Sanchez A, Patil S, Knezevic A, Stein E, Petruzella S, Weiss K, Duzgol C, Chaim J, Akin O, Mourtzakis M, Paris MT, Scott J, Kuo F, Kotecha R, Hakimi AA, Lee CH, Motzer RJ, Voss MH, Furberg H. Associations between Pretreatment Body Composition Features and Clinical Outcomes among Patients with Metastatic Clear Cell Renal Cell Carcinoma Treated with Immune Checkpoint Blockade. *Clin Cancer Res*. 2022 Dec 1;28(23):5180-5189. doi: 10.1158/1078-0432.CCR-22-1389. PMID: 36190538; PMCID: PMC9793646.

## Disclosures

Doctors and faculty members often work with pharmaceutical, device, biotechnology, and life sciences companies, and other organizations outside of MSK, to find safe and effective cancer treatments, to improve patient care, and to educate the health care community.

MSK requires doctors and faculty members to report (“disclose”) the relationships and financial interests they have with external entities. As a commitment to transparency with our community, we make that information available to the public.

Helena Furberg discloses the following relationships and financial interests:

*No disclosures meeting criteria for time period*

The information published here is for a specific annual disclosure period. There may be differences between information on this and other public sites as a result of different reporting periods and/or the various ways relationships and financial interests are categorized by organizations that publish such data.

---

This page and data include information for a specific MSK annual disclosure period (January 1, 2022 through disclosure submission in spring 2023). This data reflects interests that may or may not still exist. This data is updated annually.

Learn more about MSK’s COI policies [here](#). For questions regarding MSK’s COI-related policies and procedures, email MSK’s Compliance Office at [ecoi@mskcc.org](mailto:ecoi@mskcc.org).
