[Research](#)
 A position is currently open to highly motivated candidates with a background in molecular biology, genetics, cancer biology, and/or chromatin biology/epigenetics. The primary interest of our research group is the genetic and epigenetic regulation of oncogenic transcriptional programs involved in solid tumor pathogenesis. Projects will include transcriptome analysis, epigenome mapping, and gene-expression-based high-throughput screens, as well as murine models to understand the mechanisms of pathogenesis and to develop targeted therapies based on insight into disease pathogenesis. Applicants should hold a PhD and/or MD degree and have strong laboratory and analytical skills.

Informal inquiries may be made to Sarah Qadir at QadirS@MSKCC.Org

Mailing Address

Please mail the required application materials listed above to:

Ping Chi, MD, PhD
Member, Human Oncology and Pathogenesis Program
1275 York Avenue, Box 20
New York, NY 10021

Application Requirements

Applicants must submit the following: a curriculum vitae, a summary of current and future research interests, a description of past research experience and accomplishments, selected reprints of publications, expected availability date, and three reference.
