

Memorial Sloan-Kettering is part of a world-renowned biomedical research complex that includes Sloan-Kettering Institute, the Weill Medical College of Cornell University, and The Rockefeller University. The three institutions, which extend for several blocks along York Avenue, share not only many staff members, but extensive library and technical facilities. Staff, fellows, and students have access to shared core facilities, and an active calendar of lectures, seminars, and visits by distinguished scientists at all of the institutions.

Memorial Sloan-Kettering is located in New York City's Upper East Side, just a few minutes' walk from an abundance of restaurants, interesting shops, some of the world's best museums, and the City's centerpiece: Central Park.

Application deadlines:

Oncologic Pathology	Dec 1
Cytopathology	Dec 1
Breast Pathology	Jan 1
Dermatopathology	Jan 1
Gastrointestinal Pathology	Jan 1
Genitourinary Pathology	Jan 1
Gynecologic Pathology	Jan 1
Hematopathology	Dec 1
Molecular Genetic Pathology	Feb 1
Thoracic Pathology	July 31

Early application is encouraged.

Memorial Sloan-Kettering Cancer Center

Department of Pathology Fellowship Programs

Memorial Sloan-Kettering Cancer Center
The Best Cancer Care. Anywhere.

The Department of Pathology at Memorial Sloan-Kettering Cancer Center offers the following fellowship programs to individuals who have completed their basic training in pathology, including at least two years of anatomical pathology, and are interested in a concentrated and intensive exposure to a particular aspect of human tumor pathology.

Oncologic Surgical Pathology and Autopsy/Neuropathology Services

Pathology Subspecialty Rotations

- Bone and Soft Tissue Pathology
- Breast Pathology
- Cytopathology
- Dermatopathology
- Molecular Genetic Pathology
- Frozen Sections
- Gastrointestinal Pathology
- Genitourinary Pathology
- Gynecologic Pathology
- Head & Neck Pathology
- Hematopathology
- Neuropathology
- Thoracic Pathology

Eligibility:

Fellowships are available to individuals who have completed their basic training in pathology either in straight AP or combined AP-CP, with at least 2 years of prior AP training in an accredited U.S. or Canadian program required.

All qualified applicants are welcome, but preference will be given to individuals committed to an academic career in pathology.

There will be an attempt to identify individuals interested in combining two Department of Pathology sponsored fellowships, under the assumption that such combined experience should provide a strong basis for a successful career in academic pathology.

Apply Online at: www.mskcc.org/pathologyfellowships

Fellowship Information

Oncologic Surgical Pathology Fellowship

This is a one-year ACGME-accredited program that focuses on tumor pathology. Fellows, under the supervision of the attending staff, are actively engaged in the examination of the anatomic pathology material submitted to the Department. The material consists of over 60,000 surgical specimens and approximately 45 autopsies per year. The program incorporates subspecialty rotations including frozen sections, departmental consults, hematopathology, head and neck pathology, thoracic, soft tissue and bone, neuropathology, gynecological, gastrointestinal and genitourinary pathology. An elective period is also provided. Fellows are encouraged to participate in either clinical or basic research projects during this year. Hospital subsidized housing is available.

Positions Available: 17

Length of Program: One year

Program Director: Kay J. Park, MD

Associate Director: Samson W. Fine, MD

Apply by: Dec 1 (online application deadline)
Dec 15 (recommendation letter deadline)

MSKCC Department of Pathology Faculty & Fellows 2010-2011

Pathology Subspecialty Fellowships

- Breast Pathology
- Cytopathology*
- Dermatopathology*
- Diagnostic Molecular Pathology*
- Gastrointestinal Pathology
- Genitourinary Pathology
- Gynecologic Pathology
- Hematopathology*
- Thoracic Pathology*

*ACGME-accredited programs

These are one-year programs that provide an intensive exposure to all the components of the respective subspecialty, while concentrating on the investigative aspects.

An integral part of the program consists of exposure to the various techniques used in that subspecialty (immunohistochemical, cytogenetic, molecular, etc.) and interaction with other clinical and basic departments working in the field.

The basic research work is carried out in one of the laboratories in the Division of Molecular Pathology.

For more information and to apply online please see our website: www.mskcc.org/pathologyfellowships
