PATIENT & CAREGIVER EDUCATION

Setmelanotide

This information from Lexicomp® explains what you need to know about this medication, including what it’s used for, how to take it, its side effects, and when to call your healthcare provider.

Brand Names: US
Imcivree

Brand Names: Canada
Imcivree

What is this drug used for?

- It is used to help with weight loss and control of hunger in certain people.

What do I need to tell my doctor BEFORE I take this drug?

- If you are allergic to this drug; any part of this drug; or any other drugs, foods, or substances. Tell your doctor about the allergy and what signs you had.
- If you have kidney problems.
- If you are breast-feeding. Do not breast-feed while you take this drug.

This drug may interact with other drugs or health problems.

Tell your doctor and pharmacist about all of your drugs (prescription or OTC, natural products, vitamins) and health problems. You must check to make sure that it is safe for you to take this drug with all of your drugs and
health problems. Do not start, stop, or change the dose of any drug without checking with your doctor.

**What are some things I need to know or do while I take this drug?**

**For all patients taking this drug:**

- Tell all of your health care providers that you take this drug. This includes your doctors, nurses, pharmacists, and dentists.

- Severe allergic reactions have happened with this drug. This usually happened within minutes to hours after taking this drug. Get medical help right away if you have any signs that are not normal after getting this drug.

- Change in skin color may happen with this drug. This includes darkening of birthmarks, moles, and freckles.

- Have your skin checked as you have been told by your doctor.

- Tell your doctor if you are pregnant or plan on getting pregnant. You will need to talk about the benefits and risks of using this drug while you are pregnant.

**Children:**

- Weight loss may affect growth in children. Children need regular growth checks.

- If the patient is a newborn or infant. This drug has benzyl alcohol in it. If possible, avoid products with benzyl alcohol in newborns or infants. Serious side effects can happen in these children with some doses of benzyl alcohol, including if given with other drugs that have benzyl alcohol.
What are some side effects that I need to call my doctor about right away?

**WARNING/CAUTION:** Even though it may be rare, some people may have very bad and sometimes deadly side effects when taking a drug. Tell your doctor or get medical help right away if you have any of the following signs or symptoms that may be related to a very bad side effect:

- Signs of an allergic reaction, like rash; hives; itching; red, swollen, blistered, or peeling skin with or without fever; wheezing; tightness in the chest or throat; trouble breathing, swallowing, or talking; unusual hoarseness; or swelling of the mouth, face, lips, tongue, or throat.
- A fast heartbeat.
- New or worse behavior or mood changes like depression or thoughts of suicide.
- Some people have had sexual problems when taking this drug. This happened in both males and females. Males had erections (hard penis) that happened at times other than sex. Seek medical care right away if you are male and you have an erection that lasts more than 4 hours. Call your doctor if you have sexual problems.

What are some other side effects of this drug?

All drugs may cause side effects. However, many people have no side effects or only have minor side effects. Call your doctor or get medical help if any of these side effects or any other side effects bother you or do not go away:

- Pain, redness, swelling, or other reaction where the injection was given.
- Constipation, diarrhea, stomach pain, upset stomach, throwing up, or decreased appetite.
- Headache.
- Back pain.
- Feeling dizzy, tired, or weak.
- Joint pain.
• Dry mouth.
• Dry skin.
• Trouble sleeping.
• Hair loss.
• Signs of a common cold.
• Flu-like signs.
• Chills.
• Muscle spasm.
• Pain in arms or legs.

These are not all of the side effects that may occur. If you have questions about side effects, call your doctor. Call your doctor for medical advice about side effects.

You may report side effects to your national health agency.

You may report side effects to the FDA at 1-800-332-1088. You may also report side effects at https://www.fda.gov/medwatch.

**How is this drug best taken?**

Use this drug as ordered by your doctor. Read all information given to you. Follow all instructions closely.

• It is given as a shot into the fatty part of the skin on the top of the thigh, belly area, or upper arm.
• If you will be giving yourself the shot, your doctor or nurse will teach you how to give the shot.
• Take this drug when you first wake up.
• Take with or without food.
• Wash your hands before and after use.
• Move the site where you give the shot with each shot.
If stored in a refrigerator, let this drug come to room temperature before using it. To do this, leave it at room temperature for about 15 minutes. Do not heat this drug. You may also warm the drug by rolling it in the palms of your hands for about 1 minute.

Do not use if the solution is not clear to slightly cloudy, is leaking, or has particles.

This drug is colorless to a faint yellow. Do not use if the solution changes color.

Throw away needles in a needle/sharp disposal box. Do not reuse needles or other items. When the box is full, follow all local rules for getting rid of it. Talk with a doctor or pharmacist if you have any questions.

**What do I do if I miss a dose?**

- Skip the missed dose and go back to your normal time.
- Do not take 2 doses at the same time or extra doses.

**How do I store and/or throw out this drug?**

- Store unopened vials in a refrigerator. Do not freeze.
- If needed, you may store at room temperature for up to 30 days. Write down the date you take this drug out of the refrigerator. If stored at room temperature and not used within 30 days, throw this drug away.
- Protect from heat.
- You may store opened vials at room temperature or in a refrigerator. Throw away any part not used after 1 month.
- Keep all drugs in a safe place. Keep all drugs out of the reach of children and pets.
- Throw away unused or expired drugs. Do not flush down a toilet or pour down a drain unless you are told to do so. Check with your pharmacist if you have questions about the best way to throw out drugs. There may be drug take-back programs in your area.
General drug facts

- If your symptoms or health problems do not get better or if they become worse, call your doctor.

- Do not share your drugs with others and do not take anyone else’s drugs.

- Some drugs may have another patient information leaflet. If you have any questions about this drug, please talk with your doctor, nurse, pharmacist, or other health care provider.

- Some drugs may have another patient information leaflet. Check with your pharmacist. If you have any questions about this drug, please talk with your doctor, nurse, pharmacist, or other health care provider.

- If you think there has been an overdose, call your poison control center or get medical care right away. Be ready to tell or show what was taken, how much, and when it happened.
