

## Tecovirimat

This information from Lexicomp® explains what you need to know about this medication, including what it's used for, how to take it, its side effects, and when to call your healthcare provider.

### Brand Names: US

Tpoxx

### Brand Names: Canada

Tpoxx

### What is this drug used for?

- It is used to treat smallpox.

### What do I need to tell the doctor BEFORE my child takes this drug?

- If your child is allergic to this drug; any part of this drug; or any other drugs, foods, or substances. Tell the doctor about the allergy and what signs your child had.
- If your child has kidney disease.

### If your child is breast-feeding a baby:

- Be sure your child does not breast-feed a baby while taking this drug.

This is not a list of all drugs or health problems that interact with this drug.

Tell the doctor and pharmacist about all of your child's drugs (prescription or OTC, natural products, vitamins) and health problems. You must check to make

sure that it is safe to give this drug with all of your child's other drugs and health problems. Do not start, stop, or change the dose of any drug your child takes without checking with the doctor.

## **What are some things I need to know or do while my child takes this drug?**

### **All products:**

- Tell all of your child's health care providers that your child is taking this drug. This includes your child's doctors, nurses, pharmacists, and dentists.
- Have blood work checked as you have been told by the doctor. Talk with the doctor.
- If your child takes repaglinide, talk with your child's doctor. Taking repaglinide with this drug may cause low blood sugar.

### **If your child is pregnant:**

- Tell the doctor if your child is pregnant or becomes pregnant. You will need to talk about the benefits and risks of your child using this drug while pregnant.

### **Injection:**

- If the patient is a child younger than 2 years of age, the risk of kidney problems may be higher. Use this drug with care.

## **What are some side effects that I need to call my child's doctor about right away?**

**WARNING/CAUTION:** Even though it may be rare, some people may have very bad and sometimes deadly side effects when taking a drug. Tell your child's doctor or get medical help right away if your child has any of the following signs or symptoms that may be related to a very bad side effect:

- Signs of an allergic reaction, like rash; hives; itching; red, swollen, blistered, or peeling skin with or without fever; wheezing; tightness in the chest or throat; trouble breathing, swallowing, or talking; unusual hoarseness; or

swelling of the mouth, face, lips, tongue, or throat.

## **What are some other side effects of this drug?**

All drugs may cause side effects. However, many people have no side effects or only have minor side effects. Call your child's doctor or get medical help if any of these side effects or any other side effects bother your child or do not go away:

### **Capsules:**

- Headache.
- Upset stomach or throwing up.
- Stomach pain.

### **Injection:**

- Pain, redness, swelling, or other reaction where the injection was given.
- Headache.

These are not all of the side effects that may occur. If you have questions about side effects, call your child's doctor. Call your child's doctor for medical advice about side effects.

You may report side effects to your national health agency.

## **How is this drug best given?**

Give this drug as ordered by your child's doctor. Read all information given to you. Follow all instructions closely.

### **Capsules:**

- Have your child swallow whole with a full glass of water.
- Give this drug within 30 minutes after a full, fatty meal. Talk with your child's doctor about types of foods to eat.
- It is important that your child does not miss or skip a dose of this drug during

treatment.

- Use as you have been told, even if your child's signs get better.
- If your child has trouble swallowing this drug, the capsules may be opened and contents sprinkled in 1 ounce (30 mL) of liquid or soft food. Liquids and foods that can be used include milk, chocolate milk, infant formula, applesauce, or yogurt. Have your child swallow within 30 minutes after mixing. Do not store for future use.

### **Injection:**

- It is given as an infusion into a vein over a period of time.

## **What do I do if my child misses a dose?**

### **Capsules:**

- Give a missed dose as soon as you think about it, with food.
- If it is less than 8 hours until your child's next dose, skip the missed dose and go back to your child's normal time.
- Do not give 2 doses at the same time or extra doses.

### **Injection:**

- Call your child's doctor to find out what to do.

## **How do I store and/or throw out this drug?**

### **Capsules:**

- Store in the original container at room temperature.
- Store in a dry place. Do not store in a bathroom.

### **Injection:**

- The injection will be given to your child in a healthcare setting. You will not store it at home.

## All products:

- Keep all drugs in a safe place. Keep all drugs out of the reach of children and pets.
- Throw away unused or expired drugs. Do not flush down a toilet or pour down a drain unless you are told to do so. Check with your pharmacist if you have questions about the best way to throw out drugs. There may be drug take-back programs in your area.

## General drug facts

- If your child's symptoms or health problems do not get better or if they become worse, call your child's doctor.
- Do not share your child's drug with others and do not give anyone else's drug to your child.
- Some drugs may have another patient information leaflet. If you have any questions about this drug, please talk with your child's doctor, nurse, pharmacist, or other health care provider.
- If you think there has been an overdose, call your poison control center or get medical care right away. Be ready to tell or show what was taken, how much, and when it happened.
