§ 272.12(a)(1) requires that the applicable rules of the AHA shall apply to all persons who are members of the AHA, including those who are members of the AHA who are not members of the AHA. This includes all persons who are members of the AHA, including those who are members of the AHA who are not members of the AHA.

§ 272.12(a)(1) requires that the applicable rules of the AHA shall apply to all persons who are members of the AHA, including those who are members of the AHA who are not members of the AHA.

- The applicable rules of the AHA shall apply to all persons who are members of the AHA, including those who are members of the AHA who are not members of the AHA. This includes all persons who are members of the AHA, including those who are members of the AHA who are not members of the AHA. (GVHD)

- The applicable rules of the AHA shall apply to all persons who are members of the AHA, including those who are members of the AHA who are not members of the AHA. This includes all persons who are members of the AHA, including those who are members of the AHA who are not members of the AHA. SPF 30

§ 272.12(a)(1) requires that the applicable rules of the AHA shall apply to all persons who are members of the AHA, including those who are members of the AHA who are not members of the AHA. This includes all persons who are members of the AHA, including those who are members of the AHA who are not members of the AHA. 20

- **Antigenen** (Antigene) sind **chemische Substanzen**, die das **Immunsystem** des Körpers zu einer **Abwehrreaktion** anregen können. Sie sind **meist aus Proteinen** oder **Zuckern** aufgebaut.
- **Antikörper** (Antibiotika) sind **Proteine**, die vom **Immunsystem** in Reaktion auf ein **Antigen** produziert werden. Sie **binden an das Antigen** und markieren es für die **Zerstörung** durch **Immunzellen**.
- **Antikörper** sind **essenziell** für die **Abwehr** von **Infektionen** und die **Entsorgung** von **Zellen** und **Gewebe**, die **schädlich** für den Körper sind. Sie **binden an das Antigen** und **markieren es** für die **Zerstörung** durch **Immunzellen**.

**Antikörper** (Antibiotika) sind **Proteine**, die vom **Immunsystem** in Reaktion auf ein **Antigen** produziert werden.

GVHD (Graft-versus-Host-Disease) ist eine **Immunkrankheit**, die nach einer **Organtransplantation** oder einer **Stromatransfusion** auftreten kann. Sie **entsteht** durch die **Abwehrreaktion** des Empfängers gegen die **Zellen** des Spenders. Sie **manifestiert sich** durch  **Hautausschlag**, **Diarrhoe** und **Hämolyse**.

HLA (Human Leukocyte Antigen) sind **Proteine**, die für die **Antigenpräsentation** auf der **Zelloberfläche** von **Immunzellen** und **Gewebe** wichtig sind. Sie **binden an das Antigen** und **markieren es** für die **Zerstörung** durch **Immunzellen**.

If you have questions or concerns, contact your healthcare provider. A member of your care team will answer Monday through Friday from 9 a.m. to 5 p.m. Outside those hours, you can leave a message or talk with another MSK provider. There is always a doctor or nurse on call. If you're not sure how to reach your healthcare provider, call 212-639-2000.
