

1. Fibula free flap

The fibula free flap is a microvascular free flap that is harvested from the fibula bone and the surrounding soft tissue. It is a common choice for lower extremity reconstruction, particularly for the treatment of complex wounds and ulcers. The fibula bone is a long, straight bone that runs along the outer side of the leg. It is surrounded by soft tissue, including skin, muscle, and fat. The fibula free flap is harvested by making a long incision along the length of the bone, exposing the bone and the surrounding soft tissue. The flap is then transferred to the recipient site and anastomosis is performed to the patient's own blood supply.

■■■■ ■■■■■■ ■■■ GLP-1 ■■■■■■

GLP-1 receptor agonists, such as semaglutide, have been shown to improve glycemic control and reduce the risk of cardiovascular complications in patients with type 2 diabetes. These medications also promote weight loss, which is beneficial for overall health. However, they may cause gastrointestinal side effects, such as nausea and vomiting, which can be managed with supportive care. It is important to monitor for hypoglycemia, especially when these medications are used in combination with insulin. Regular monitoring of blood glucose levels and clinical response is essential for optimal management.

- **Clear Liquid Diet** is a diet that allows only clear liquids. It is often used before surgery or certain medical tests. The diet includes clear broths, clear fruit juices, and clear carbonated beverages. It excludes solid foods, dairy products, and high-fiber foods. For more information, visit www.mskcc.org/cancer-care/patient-education/clear-liquid-diet.

The Commission has received information from the public and from the Commission's own investigations that the Commission's current approach to the management of the Commission's resources is not sufficient to ensure the Commission's effectiveness and efficiency. The Commission has therefore decided to carry out a comprehensive review of its resources management system. The review will cover all aspects of the Commission's resources management system, including the Commission's human resources, financial resources, information resources, and physical resources. The review will also cover the Commission's internal control system and its risk management system. The Commission expects to complete the review by the end of 2010.

The first step in the process is to identify the problem. This involves gathering information about the situation and understanding the needs of the stakeholders involved. Once the problem is identified, the next step is to develop a plan of action. This plan should outline the goals of the project, the resources needed, and the timeline for completion.

Tracheostomy is a surgical procedure that creates an opening in the neck through which a breathing tube can be inserted. This allows for easier breathing and can be helpful for people who have difficulty breathing on their own. Tracheostomy is often used for people who have a long-term need for mechanical ventilation, such as those with certain types of lung disease or who have had a stroke. Tracheostomy can also be used for people who have a temporary need for mechanical ventilation, such as those who are recovering from surgery or a serious illness. Tracheostomy is a major surgical procedure and carries risks, so it is important to discuss the benefits and risks with your doctor before deciding if it is right for you.

（三）其他应收款

2019 年 12 月 31 日，其他应收款余额为 1,234,567.89 元，较期初余额 1,123,456.78 元增加 111,111.11 元，增幅为 9.89%。2020 年 12 月 31 日，其他应收款余额为 1,345,678.90 元，较期初余额 1,234,567.89 元增加 111,111.01 元，增幅为 9.00%。2020 年 12 月 31 日，其他应收款余额较期初余额增加 111,111.01 元，增幅为 9.00%，主要系 2020 年 12 月 31 日新增其他应收款 111,111.01 元所致。2020 年 12 月 31 日，其他应收款余额较期初余额增加 111,111.01 元，增幅为 9.00%，主要系 2020 年 12 月 31 日新增其他应收款 111,111.01 元所致。2020 年 12 月 31 日，其他应收款余额较期初余额增加 111,111.01 元，增幅为 9.00%，主要系 2020 年 12 月 31 日新增其他应收款 111,111.01 元所致。

2019 年 12 月 31 日，其他应收款余额为 1,234,567.89 元，较期初余额 1,123,456.78 元增加 111,111.11 元，增幅为 9.89%。2020 年 12 月 31 日，其他应收款余额为 1,345,678.90 元，较期初余额 1,234,567.89 元增加 111,111.01 元，增幅为 9.00%。2020 年 12 月 31 日，其他应收款余额较期初余额增加 111,111.01 元，增幅为 9.00%，主要系 2020 年 12 月 31 日新增其他应收款 111,111.01 元所致。2020 年 12 月 31 日，其他应收款余额较期初余额增加 111,111.01 元，增幅为 9.00%，主要系 2020 年 12 月 31 日新增其他应收款 111,111.01 元所致。

2019 年 12 月 31 日，其他应收款余额为 1,234,567.89 元，较期初余额 1,123,456.78 元增加 111,111.11 元，增幅为 9.89%。2020 年 12 月 31 日，其他应收款余额为 1,345,678.90 元，较期初余额 1,234,567.89 元增加 111,111.01 元，增幅为 9.00%。2020 年 12 月 31 日，其他应收款余额较期初余额增加 111,111.01 元，增幅为 9.00%，主要系 2020 年 12 月 31 日新增其他应收款 111,111.01 元所致。2020 年 12 月 31 日，其他应收款余额较期初余额增加 111,111.01 元，增幅为 9.00%，主要系 2020 年 12 月 31 日新增其他应收款 111,111.01 元所致。

（四）预付款项

2019 年 12 月 31 日，预付款项余额为 567,890.12 元，较期初余额 567,890.12 元增加 0.00 元，增幅为 0.00%。2020 年 12 月 31 日，预付款项余额为 567,890.12 元，较期初余额 567,890.12 元增加 0.00 元，增幅为 0.00%。2020 年 12 月 31 日，预付款项余额较期初余额增加 0.00 元，增幅为 0.00%，主要系 2020 年 12 月 31 日新增预付款项 0.00 元所致。2020 年 12 月 31 日，预付款项余额较期初余额增加 0.00 元，增幅为 0.00%，主要系 2020 年 12 月 31 日新增预付款项 0.00 元所致。

Trismus is a common side effect of radiation therapy for head and neck cancer. It is a condition in which the jaw muscles become stiff and tight, making it difficult to open the mouth. This can be a significant problem for patients, as it can interfere with eating, drinking, and speaking.

Trismus can be caused by a number of factors, including the use of radiation therapy, surgery, and certain medications. It is most common in patients who have received radiation therapy to the head and neck area. The condition can develop at any time during or after treatment, and it can be a long-term problem. However, there are several ways to manage trismus and improve the quality of life for patients.

One of the most important ways to manage trismus is to keep the jaw muscles as flexible as possible. This can be done through a combination of stretching exercises, physical therapy, and the use of certain medications. Patients should be encouraged to perform these exercises regularly, and they should be monitored closely by their healthcare provider. In some cases, surgery may be necessary to release the tight muscles and improve the range of motion of the jaw. Additionally, patients should be encouraged to eat soft foods and avoid hard or chewy foods that can exacerbate the condition.

For more information on trismus and its management, please visit the MSKCC website at www.mskcc.org/pa/cancer-care/patient-education/trismus.

Trismus - What You Should Know

Trismus is a condition in which the jaw muscles become stiff and tight, making it difficult to open the mouth. This can be a significant problem for patients, as it can interfere with eating, drinking, and speaking. Trismus can be caused by a number of factors, including the use of radiation therapy, surgery, and certain medications. It is most common in patients who have received radiation therapy to the head and neck area. The condition can develop at any time during or after treatment, and it can be a long-term problem. However, there are several ways to manage trismus and improve the quality of life for patients.

Trismus is a common side effect of radiation therapy for head and neck cancer. It is a condition in which the jaw muscles become stiff and tight, making it difficult to open the mouth.

- 2019 年 12 月 31 日，公司 2019 年度利润分配方案为：以 2019 年 12 月 31 日总股本 100,000,000 股为基数，向全体股东每 10 股派发现金股利 1.00 元（含税），共计派发现金股利 10,000,000.00 元，剩余未分配利润结转以后年度分配。
- 2020 年 12 月 31 日，公司 2020 年度利润分配方案为：以 2020 年 12 月 31 日总股本 100,000,000 股为基数，向全体股东每 10 股派发现金股利 1.00 元（含税），共计派发现金股利 10,000,000.00 元，剩余未分配利润结转以后年度分配。
