In addition, you may be asked to speak with one of our medical professionals at the blood bank and scheduled for a follow-up visit and further testing. Your consent for re-testing will be requested again at that time.

The names of donors with positive test results are kept in confidential files and will not be released without your written consent unless required by law. We will not notify you if your test results are negative and we do not find any problems or if the blood samples we collected were insufficient to provide enough blood to complete laboratory tests.

If You Have Concerns After You Have Donated

If after giving blood, if you become aware of or remember any information about your health that could affect whether we should transfuse your blood, please call the Blood Donor Room at [212-639-7648](tel:212-639-7648) or email donateblood@mskcc.org.

Please Note

As of June 1, 2000, Public Health Law (PHL 2131) requires that a confirmed positive HIV test be confidentially reported to the New York State Department of Health.
