About Me

What I Do at MSK

- Section Head, Colorectal Cancer
- Co-Director, Center for Young Onset Colorectal and Gastrointestinal Cancers

Get To Know Me

I am a board-certified medical oncologist specializing in the treatment of patients with gastrointestinal (GI) cancers, particularly colorectal cancer (CRC), appendix cancer, and cholangiocarcinoma. My research is focused on the development of novel systemic and regional therapies, including approaches based on tumor genomics, with the goal of improving outcomes while minimizing treatment-related toxicities.

I am the founder and co-director of the Center for Young Onset Colorectal and Gastrointestinal Cancer. This clinic — the first c its kind in the world — is dedicated solely to the specific needs of people under 50 who have CRC or other GI cancers.

My Role at MSK

A gastrointestinal (GAS-troh-in-TES-tih-nul) oncologist is a cancer doctor with special training in the gastrointestinal (GI) system. This includes anal, colorectal, esophageal, gastric (stomach), liver, and pancreatic cancers, as well as GI stromal tumors and neuroendocrine tumors.
