Get to Know Me

I am an endocrinologist with particular interest in bone metabolism in people with cancer. I see both patients with benign metabolic bone diseases, such as osteoporosis and hyperparathyroidism, and bone disorders due to advanced cancer, such as hypercalcemia and metastatic bone disease.

Much of my research has focused on rare complications of a subset of bone protective drugs known as antiresorptives. I have twice served on the National Comprehensive Cancer Care Network's Bone Health in Cancer Care task force.

Disclosures

Members of the MSK Community often work with pharmaceutical, device, biotechnology, and life sciences companies, and other organizations outside of MSK, to find safe and effective cancer treatments, to improve patient care, and to educate the health care community. These activities outside of MSK further our mission, provide productive collaborations, and promote the practical application of scientific discoveries.

MSK requires doctors, faculty members, and leaders to report ("disclose") the relationships and financial interests they have with external entities. As a commitment to transparency with our community, we make that information available to the public. Not all disclosed interests and relationships present conflicts of interest. MSK reviews all disclosed interests and relationships to assess whether a conflict of interest exists and whether formal COI management is needed.

Azeez Farooki discloses the following relationships and financial interests:

- Ascendis Pharma, Inc.
