# About Me

## What I Do at MSK

- Chief, Breast Medicine Service

## Get To Know Me

I am a board-certified medical oncologist who specializes in the identification and management of individuals who have inherited an increased risk for cancer. I concentrate on helping men and women with cancer incorporate genetic information into their treatment plan. For those who are at increased risk, but have not been diagnosed, I work to develop a plan that will help them either prevent the development of cancer, or limit its impact if it occurs.

Along the same lines, my research focus has studied the best ways to use genetic information to improve the outcomes of those with or at risk for hereditary cancers of all types.
