Get to Know Me

As a surgical oncologist, I care for patients with benign and malignant (cancerous) diseases of the liver, bile duct, gallbladder, and pancreas. Many patients come to me with cancer that has spread (metastasized) from the colon to the liver. I also have an interest in benign pancreatic tumors, which do not necessarily merit immediate removal but should be carefully watched for any changes that warrant surgery.

The tumors that I treat are uncommon, and many forms were once thought to be incurable. But because of innovative research, largely done at Memorial Sloan Kettering Cancer Center, and my close collaboration with our radiologists and medical oncologists, I can often offer patients a good chance at long-term survival and, in many cases, cure.

Our team of eight board-certified surgeons performs approximately 1,000 operations a year for hepatopancreatobiliary (HPB)-related disease.

Clinical Trials

Find a Clinical Trial for You

Memorial Sloan Kettering's doctors and scientists are constantly developing new treatments for cancer. MSK is typically running hundreds of clinical trials at a given time.

You may be able to participate in a clinical trial even if you are new to MSK. Search our online directory to find trial information and see more about who can participate.

Disclosures

Members of the MSK Community often work with pharmaceutical, device, biotechnology, and life sciences companies, and other organizations outside of MSK, to find safe and effective cancer treatments, to improve patient care, and to educate the health care community. These activities outside of MSK further our mission, provide productive collaborations, and promote the practical application of scientific discoveries.

MSK requires doctors, faculty members, and leaders to report ("disclose") the relationships and financial interests they have with external entities. As a commitment to transparency with our community, we make that information available to the public. Not all disclosed interests and relationships present conflicts of interest. MSK reviews all disclosed interests and relationships to assess whether a conflict of interest exists and whether formal COI management is needed.

Michael I. D'Angelica discloses the following relationships and financial interests:

No disclosures meeting criteria for time period

If you're a patient at MSK and would like more information about your doctor's external relationships, please talk with your doctor.

The information published here is a complement to other publicly reported data and is for a specific annual disclosure period. There may be differences between information on this and other public

sites as a result of different reporting periods and/or the various ways relationships and financial interests are categorized by organizations that publish such data.

This page and data include information for a specific MSK annual disclosure period (January 1, 2024 through disclosure submission in spring 2025). This data reflects interests that may or may not still exist. This data is updated annually.

Learn more about MSK's COI policies here . For questions regarding MSK's COI-related policies and procedures, email MSK's Compliance Office at ecoi@mskcc.org .
