# About Me

## What I Do at MSK

- Attending Physician

## Get To Know Me

I am a physician-scientist and board-certified medical oncologist. At Memorial Sloan Kettering Cancer Center (MSK), I work closely with colleagues across areas, like surgery and radiation oncology, to care for people with [soft tissue](#) and bone sarcomas.

There are many different types of sarcomas. Personalized treatment is important because no two sarcomas are the same. The treatment plans that my colleagues, patients, and I create together are always focused on adjusting care to meet each patient's needs and goals.
