About Me

What I Do at MSK

- Deputy Chief and Attending, Thoracic Service
- Vice Chair for Translational Research, Department of Surgery
- Co-Director, Mesothelioma Program
- Member, Solid Tumors Cell Therapy, Cellular Therapeutics Center
- Min H. & Yu-Fan C. Kao Chair in Thoracic Cancer

Get To Know Me

I am a surgeon with expertise in the diagnosis and treatment of thoracic cancers (cancers of the chest). These include lung cancer, mesothelioma, thymoma, mediastinal and chest wall tumors. I also specialize in cancers that have spread to the lung and pleura (layers of protective tissue that surround the lungs).

I see approximately 600 patients annually and have been caring for people with thoracic cancers for the past 15 years. I have expertise in the workup needed for the early diagnosis and accurate staging of thoracic cancers. For this, I use endoscopic methods such as endobronchial ultrasound (EBUS), robotic bronchoscopy, and video-assisted thoracoscopic surgery (VATS).

Find a Clinical Trial for You

Memorial Sloan Kettering's doctors and scientists are constantly developing new treatments for cancer. MSK is typically running hundreds of clinical trials at a given time.

You may be able to participate in a clinical trial even if you are new to MSK. Search our online directory to find trial information and see more about who can participate.

Disclosures

Doctors and faculty members often work with pharmaceutical, device, biotechnology, and life sciences companies, and other organizations outside of MSK, to find safe and effective cancer treatments, to improve patient care, and to educate the health care community.

MSK requires doctors and faculty members to report ("disclose") the relationships and financial interests they have with external entities. As a commitment to transparency with our community, we make that information available to the public.

Prasad S. Adusumilli discloses the following relationships and financial interests:
