## Get to Know Me

Since 1998, I have been the Director of Pediatric Radiation Oncology on the MSK Kids team who cares for children and young adults with cancer. I am a member of the pediatric, ophthalmic, and bone marrow transplant disease management teams at MSK and work very closely with other doctors in these specialties.

I have extensive experience treating rare diseases in young people such as [sarcomas](#) , [brain tumors](#) , [neuroblastoma](#) , [Wilms' tumor](#) , [lymphoma](#) , and [leukemia](#) . [Radiation therapy](#) is an extremely powerful tool for these tumors, but young patients are especially sensitive to long-term side effects. I therefore approach each patient as a unique individual, carefully designing a highly customized radiation therapy plan to maximize the benefits of treatment while minimizing side effects.

I am a leader in the use of targeted approaches such as [proton therapy](#) , [intensity-modulated radiation therapy](#) , [image-guided radiation therapy](#) , and intra-operative radiation therapy for pediatric cancers.

## What I Do at MSK

I'm a radiation oncologist, which is a cancer doctor with special training in using radiation therapy (RT) to treat cancer.

- Director, Pediatric Radiation Oncology

## Areas of Expertise

### Conditions I Treat

- Ewing sarcoma

- Neuroblastoma
- Osteosarcoma
- Pediatric brain tumors
- Pediatric leukemias
- Pediatric lymphomas
- Pediatric sarcomas
- Retinoblastoma
- Pediatric rhabdomyosarcomas
- Wilms' tumor (nephroblastoma)

## **My Specialties**

- Proton therapy
- Intensity-modulated radiation therapy (IMRT)
- Image-guided radiation therapy (IGRT)
- Intraoperative radiation therapy (IORT)

## **Education & Honors**

### **Education**

- MD, University of California San Francisco

### **Residencies**

- Radiation Oncology - Stanford University Medical Center

### **Board Certifications**

- Radiation Oncology

### **Awards and Honors**

- Castle Connolly: America's Top Doctor (2026)
- Castle Connolly: America's Top Doctor (2025)
- Castle Connolly: Exceptional Women in Medicine (2024)
- Castle Connolly: America's Top Doctor (2024)
- Top Doctors New York Metro Area, Castle Connolly (2023)
- Exceptional Women in Medicine Award, Castle Connolly (2023)
- Castle Connolly: America's Top Doctors (2023)
- Castle Connolly: New York Magazine Top Doctors (2007-2020)

## Insurance Information

Understanding your insurance options is an important part of managing your cancer care. We have relationships with many common healthcare providers and plans.

Don't see your carrier or plan? [We can help you understand your coverage](#) .

If you don't have health insurance or are worried that your care may not be fully covered, our [financial assistance](#) programs may be able to help.

If you have questions about insurance, call us at [646-497-9176](#) .

## Make an Appointment

### New Patients

Scheduling an appointment is easy. Click or call [833-MSK-KIDS](#) — we're available Monday through Friday, 9 a.m. to 5 p.m. (Eastern time)

## Clinical Trials

- Clinical Trials Co-Investigated by Dr. Wolden
- [A Phase 2 Study of a Lower Radiation Therapy Dose to Treat Children and Young Adults With Central Nervous System Germinoma](#)
- [A Phase 3 Study of Inotuzumab Ozogamicin and Standard Chemotherapy for Newly Diagnosed High-Risk B-Cell Acute Lymphocytic Leukemia, Mixed Acute Leukemia, and Disseminated B-LLy](#)
- [A Phase I/II Study of Selinexor and Radiation Therapy for Newly Diagnosed Pediatric Diffuse Intrinsic Pontine Glioma and High-Grade Glioma](#)
- [A Phase II Study of Chemotherapy Followed by Radiation Therapy for Children and Young Adults with Localized Non-Germinomatous Germ Cell Tumors of the Brain or Spinal Cord](#)

## Find a Clinical Trial for You

Memorial Sloan Kettering's doctors and scientists are constantly developing new treatments for cancer. MSK is typically running hundreds of clinical trials at a given time.

You may be able to participate in a clinical trial even if you are new to MSK. Search our online directory to find trial information and see more about who can participate.

## Disclosures

Members of the MSK Community often work with pharmaceutical, device, biotechnology, and life sciences companies, and other organizations outside of MSK, to find safe and effective cancer treatments, to improve patient care, and to educate the health care community. These activities outside of MSK further our mission, provide productive collaborations, and promote the practical application of scientific discoveries.

MSK requires doctors, faculty members, and leaders to report ("disclose") the relationships and financial interests they have with external entities. As a commitment to transparency with our community, we make that information available to the public. Not all disclosed interests and relationships present conflicts of interest. MSK reviews all disclosed interests and relationships to assess whether a conflict of interest exists and whether formal COI management is needed.

Suzanne L. Wolden discloses the following relationships and financial interests:

*No disclosures meeting criteria for time period*

If you're a patient at MSK and would like more information about your doctor's external relationships, please talk with your doctor.

The information published here is a complement to other publicly reported data and is for a specific annual disclosure period. There may be differences between information on this and other public sites as a result of different reporting periods and/or the various ways relationships and financial interests are categorized by organizations that publish such data.

---

This page and data include information for a specific MSK annual disclosure period (January 1, 2024 through disclosure submission in spring 2025). This data reflects interests that may or may not still exist. This data is updated annually.

Learn more about MSK's COI policies [here](#). For questions regarding MSK's COI-related policies and procedures, email MSK's Compliance Office at [ecoi@mskcc.org](mailto:ecoi@mskcc.org).
