[Annual report](#)

[Give to MSK](#)

I provide nursing care for people with multiple myeloma and amyloidosis in all stages of treatment. I am also involved in screening, recruiting, and monitoring patients enrolled in clinical trials that are testing novel agents to treat multiple myeloma.

I joined Memorial Sloan Kettering in 2010 as a nurse practitioner on the Adult Bone Marrow Transplant Service. In addition to caring for patients admitted to this service undergoing autologous and allogeneic stem cell transplant, I provided clearance for potential donors.
