

PATIENT & CAREGIVER EDUCATION

Young Adult Partner Loss Support Group

This is an 8 week online support group for young adults who have lost a partner or spouse treated at MSK. The MSK Bereavement Program invites you to a group where you can receive support around navigating the loss of a partner, lessen feelings of isolation, and address topics specific to the young adult population. If you would like more information about the group, please register below. Prior to registering, please ensure the dates and times work with your schedule as this is a closed group, and we do require that you are able to attend all sessions.

Audience

This support group is open to young adults who lost a partner/spouse treated at MSK. For the purposes of this group, we define young adults as anyone in their 20s, 30s, or 40s, but if you fall outside of this range and feel this group would be appropriate, please reach out to us directly.
