Budesonide (Oral Inhalation)

This information from Lexicomp® explains what you need to know about this medication, including what it’s used for, how to take it, its side effects, and when to call your healthcare provider.

**Brand Names: US**
Pulmicort; Pulmicort Flexhaler

**Brand Names: Canada**
Pulmicort Nebuamp; Pulmicort Turbuhaler; TEVA-Budesonide

**What is this drug used for?**

- It is used to treat asthma.
- It may be given to your child for other reasons. Talk with the doctor.
- Do not give this drug to treat an asthma attack. Use a rescue inhaler. Talk with the doctor.

**What do I need to tell the doctor BEFORE my child takes this drug?**

**All products:**

- If your child has an allergy to this drug or any part of this drug.
• If your child is allergic to any drugs like this one or any other drugs, foods, or other substances. Tell the doctor about the allergy and what signs your child had, like rash; hives; itching; shortness of breath; wheezing; cough; swelling of face, lips, tongue, or throat; or any other signs.

Inhaler:

• If your child is allergic to milk, talk with the doctor.

This drug may interact with other drugs or health problems.

Tell the doctor and pharmacist about all of your child’s drugs (prescription or OTC, natural products, vitamins) and health problems. You must check to make sure that it is safe for your child to take this drug with all of his/her drugs and health problems. Do not start, stop, or change the dose of any drug your child takes without checking with the doctor.

What are some things I need to know or do while my child takes this drug?

• Tell all of your child’s health care providers that your child is taking this drug. This includes your child’s doctors, nurses, pharmacists, and dentists.

• Your child may have more chance of getting infections. Have your child wash hands often. Avoid crowds and people with infections, colds, or flu.

• Call the doctor right away if your child has breathing problems that get worse, if the rescue inhaler does not work
as well, or if your child needs to use the rescue inhaler more often.

- When changing from an oral steroid to another form of steroid, there may be very bad and sometimes deadly side effects. Signs like weakness, feeling tired, dizziness, upset stomach, throwing up, not thinking clearly, or low blood sugar may happen. Call the doctor right away if your child has any of these signs. If your child has a bad injury, has surgery, or any type of infection, he/she may need extra doses of oral steroids. These extra steroids will help your child’s body deal with these stresses. Have your child wear medical alert ID (identification).

- If your child has been taking this drug for many weeks, talk with your child’s doctor before stopping. You may want to slowly stop this drug.

- Chickenpox and measles can be very bad or even deadly in some people taking steroid drugs like this drug. Avoid having your child near anyone with chickenpox or measles if your child has not had these health problems before. If your child has been exposed to chickenpox or measles, talk with the doctor.

- Long-term use may raise the chance of cataracts, glaucoma, or weak bones (osteoporosis). Talk with your child’s doctor.

- Your child may need to have a bone density test. Talk with the doctor.

- Have your child’s eye pressure checked if your child is on this
drug for a long time. Talk with the doctor.

- This drug may affect growth in children and teens in some cases. They may need regular growth checks. Talk with the doctor.

If your child is pregnant or breast-feeding a baby:

- Talk with the doctor if your child is pregnant, becomes pregnant, or is breast-feeding a baby. You will need to talk about the benefits and risks to your child and the baby.

What are some side effects that I need to call my child’s doctor about right away?

**WARNING/CAUTION:** Even though it may be rare, some people may have very bad and sometimes deadly side effects when taking a drug. Tell your child’s doctor or get medical help right away if your child has any of the following signs or symptoms that may be related to a very bad side effect:

- Signs of an allergic reaction, like rash; hives; itching; red, swollen, blistered, or peeling skin with or without fever; wheezing; tightness in the chest or throat; trouble breathing, swallowing, or talking; unusual hoarseness; or swelling of the mouth, face, lips, tongue, or throat.

- Signs of infection like fever, chills, very bad sore throat, ear or sinus pain, cough, more sputum or change in color of sputum, pain with passing urine, mouth sores, or wound that will not heal.

- Signs of a weak adrenal gland like a very bad upset stomach
or throwing up, very bad dizziness or passing out, muscle weakness, feeling very tired, mood changes, not hungry, or weight loss.

- Signs of Cushing’s disease like weight gain in the upper back or belly, moon face, very bad headache, or slow healing.
- Chest pain.
- Anxiety.
- Severe diarrhea.
- Very upset stomach or throwing up.
- Not hungry.
- Very bad headache.
- Feeling very tired or weak.
- Bone or joint pain.
- Change in eyesight.
- Redness or white patches in mouth or throat.
- A burning, numbness, or tingling feeling that is not normal.
- This drug can cause very bad breathing problems right after your child takes a dose. Sometimes, this may be life-threatening. If your child has trouble breathing, breathing that is worse, wheezing, or coughing after using this drug, have your child use a rescue inhaler and get medical help right away.

What are some other side effects of this drug?
All drugs may cause side effects. However, many people have no side effects or only have minor side effects. Call your child’s doctor or get medical help if any of these side effects or any other side effects bother your child or do not go away:

**All products:**

- Signs of a common cold.
- Nose or throat irritation.
- Upset stomach.

**Liquid for breathing in:**

- Cough.
- Nosebleed.

These are not all of the side effects that may occur. If you have questions about side effects, call your child’s doctor. Call your child’s doctor for medical advice about side effects.

You may report side effects to your national health agency.

**How is this drug best given?**

Give this drug as ordered by your child’s doctor. Read all information given to you. Follow all instructions closely.

**Inhaler:**

- For breathing in only.
- Prime the inhaler before first use by twisting brown grip as
far as it will go both ways. Then repeat twisting.

- Do not use a spacer with the inhaler.
- Put the cap back on after your child is done using a dose.

**Liquid for breathing in:**

- For breathing in only as a liquid (solution) by a special machine (nebulizer) into the lungs.
- Do not let your child swallow this drug.
- Do not mix other drugs in nebulizer.
- Shake gently before use.
- Wash face after the dose if using a face mask.

**All products:**

- Keep giving this drug to your child as you have been told by your child’s doctor or other health care provider, even if your child feels well.
- Have your child rinse out the mouth after each use. Do not let your child swallow the rinse water. Have your child spit it out.
- If your child is taking more than 1 inhaled drug, talk to the doctor about the best order for taking the drugs.

**What do I do if my child misses a dose?**

- Skip the missed dose and go back to your child’s normal time.
Do not give 2 doses at the same time or extra doses.

**How do I store and/or throw out this drug?**

**Inhaler:**
- Store at room temperature. Throw away after date shown on the inhaler.

**Liquid for breathing in:**
- Store upright at room temperature. Do not freeze.
- Protect from light.
- Throw away any part of opened pouch that is not used after 2 weeks.

**All products:**
- Store in a dry place. Do not store in a bathroom.
- Keep all drugs in a safe place. Keep all drugs out of the reach of children and pets.
- Throw away unused or expired drugs. Do not flush down a toilet or pour down a drain unless you are told to do so.
  Check with your pharmacist if you have questions about the best way to throw out drugs. There may be drug take-back programs in your area.

**General drug facts**
- If your child’s symptoms or health problems do not get better or if they become worse, call your child’s doctor.
• Do not share your child’s drug with others and do not give anyone else’s drug to your child.

• Keep a list of all your child’s drugs (prescription, natural products, vitamins, OTC) with you. Give this list to your child’s doctor.

• Talk with your child’s doctor before giving your child any new drug, including prescription or OTC, natural products, or vitamins.

• Some drugs may have another patient information leaflet. If you have any questions about this drug, please talk with your doctor, nurse, pharmacist, or other health care provider.

• If you think there has been an overdose, call your poison control center or get medical care right away. Be ready to tell or show what was taken, how much, and when it happened.
