

PATIENT & CAREGIVER EDUCATION

Post-Treatment Cancer-Related Lymphedema Survivorship Support Group

Lymphedema is a chronic condition that some patients face after treatment for cancer. Join us for this support and discussion group aimed at connecting with other patients, sharing techniques and tips for managing lymphedema and coping with this chronic condition.

This presentation and interactive discussion is for people who have lymphedema as a result of cancer treatment and is co-led by an oncology social worker and physical therapist.

Audience:

This online support group is open to MSK patients.
