

PATIENT & CAREGIVER EDUCATION

Ciclesonide (Nasal)

This information from Lexicomp® explains what you need to know about this medication, including what it's used for, how to take it, its side effects, and when to call your healthcare provider.

Brand Names: US

Omnaris; Zetonna [DSC]

Brand Names: Canada

APO-Ciclesonide [DSC]; Omnaris

What is this drug used for?

- It is used to ease allergy signs.

What do I need to tell my doctor BEFORE I take this drug?

- If you are allergic to this drug; any part of this drug; or any other drugs, foods, or substances. Tell your doctor about the allergy and what signs you had.

This drug may interact with other drugs or health problems.

Tell your doctor and pharmacist about all of your drugs (prescription or OTC, natural products, vitamins) and

health problems. You must check to make sure that it is safe for you to take this drug with all of your drugs and health problems. Do not start, stop, or change the dose of any drug without checking with your doctor.

What are some things I need to know or do while I take this drug?

- Tell all of your health care providers that you take this drug. This includes your doctors, nurses, pharmacists, and dentists.
- It may take a few weeks to see the full effect.
- This drug may raise the chance of cataracts or glaucoma. Talk with the doctor.
- Talk with your doctor if you come into contact with anyone who has chickenpox or measles and you have not had chickenpox, measles, or the vaccines for them.
- If you have had any recent nose surgery, injury, ulcers, or sores, talk with your doctor.
- This drug may affect growth in children and teens in some cases. They may need regular growth checks. Talk with the doctor.
- Tell your doctor if you are pregnant, plan on getting pregnant, or are breast-feeding. You will need to talk about the benefits and risks to you and the baby.

What are some side effects that I need to call my doctor about right away?

WARNING/CAUTION: Even though it may be rare, some people may have very bad and sometimes deadly side effects when taking a drug. Tell your doctor or get medical help right away if you have any of the following signs or symptoms that may be related to a very bad side effect:

- Signs of an allergic reaction, like rash; hives; itching; red, swollen, blistered, or peeling skin with or without fever; wheezing; tightness in the chest or throat; trouble breathing, swallowing, or talking; unusual hoarseness; or swelling of the mouth, face, lips, tongue, or throat.
- Signs of infection like fever, chills, very bad sore throat, ear or sinus pain, cough, more sputum or change in color of sputum, pain with passing urine, mouth sores, or wound that will not heal.
- Signs of a weak adrenal gland like a severe upset stomach or throwing up, severe dizziness or passing out, muscle weakness, feeling very tired, mood changes, decreased appetite, or weight loss.
- Nose sores.
- Loss of smell.
- Runny nose that is new or worse.
- Whistling sound when you breathe.

- Redness or white patches in mouth or throat.
- Change in eyesight.

What are some other side effects of this drug?

All drugs may cause side effects. However, many people have no side effects or only have minor side effects. Call your doctor or get medical help if any of these side effects or any other side effects bother you or do not go away:

- Nose or throat irritation.
- Nosebleed.
- Dizziness or headache.
- Ear pain.

These are not all of the side effects that may occur. If you have questions about side effects, call your doctor. Call your doctor for medical advice about side effects.

You may report side effects to your national health agency.

You may report side effects to the FDA at 1- 800-332-1088. You may also report side effects at
<https://www.fda.gov/medwatch>.

How is this drug best taken?

Use this drug as ordered by your doctor. Read all information given to you. Follow all instructions closely.

All products:

- Do not take this drug by mouth. Use in your nose only. Keep out of your mouth and eyes (may burn).
- Blow your nose before use.
- Close 1 nostril.
- Put nose spray tube into other nostril.
- Spray up the nose only. Do not spray onto the wall joining the two nostrils.
- Put the cap back on after you are done using your dose.
- Do not blow your nose for 15 minutes after you use this drug.
- Follow how to clean carefully.
- Keep using this drug as you have been told by your doctor or other health care provider, even if you feel well.

Nose spray:

- Prime by spraying 8 sprays before first using. If this drug has not been used for 4 days, spray 1 time or until you

see a fine mist.

- Shake well before use.
- When using, tilt your head forward a little.

Nose aerosol:

- Prime by spraying 3 sprays before first use or if this drug has not been used for 10 days.
- When using, tilt your head back.
- If the device is dropped and it comes apart, put back together and test spray before using.
- Do not use near an open flame or while smoking. It may burst.
- This product has a dose counter to keep track of how many doses are left. Throw away when the dose counter reaches “0.”
- Clean nose piece by wiping with a dry tissue or cloth. Do not wash or put in water.

What do I do if I miss a dose?

- Use a missed dose as soon as you think about it.
- If it is close to the time for your next dose, skip the missed dose and go back to your normal time.
- Do not use 2 doses at the same time or extra doses.

How do I store and/or throw out this drug?

All products:

- Store at room temperature. Do not freeze.
- Keep all drugs in a safe place. Keep all drugs out of the reach of children and pets.
- Throw away unused or expired drugs. Do not flush down a toilet or pour down a drain unless you are told to do so. Check with your pharmacist if you have questions about the best way to throw out drugs. There may be drug take-back programs in your area.

Nose spray:

- Throw away any part not used after 120 sprays or 4 months after opening pouch.

Nose aerosol:

- Protect from heat or open flame. Do not puncture or burn even if it seems empty.

General drug facts

- If your symptoms or health problems do not get better or if they become worse, call your doctor.
- Do not share your drugs with others and do not take anyone else's drugs.
- Some drugs may have another patient information

leaflet. If you have any questions about this drug, please talk with your doctor, nurse, pharmacist, or other health care provider.

- Some drugs may have another patient information leaflet. Check with your pharmacist. If you have any questions about this drug, please talk with your doctor, nurse, pharmacist, or other health care provider.
- If you think there has been an overdose, call your poison control center or get medical care right away. Be ready to tell or show what was taken, how much, and when it happened.
