PATIENT & CAREGIVER EDUCATION

Ergonovine

This information from Lexicomp® explains what you need to know about this medication, including what it’s used for, how to take it, its side effects, and when to call your healthcare provider.

Warning

- If you have heart disease, talk with your doctor.
- High blood pressure has happened with this drug. Have your blood pressure checked as you have been told by your doctor.
- Death of body tissue (gangrene) and other effects have happened with use of this drug for a long time. If you have questions, talk with your doctor.
- Do not use this drug for longer than you were told by your doctor.

What is this drug used for?

- It is used to stop or treat bleeding that happens after a birth or an abortion.

What do I need to tell my doctor BEFORE I take this drug?

- If you are allergic to this drug; any part of this drug; or any other drugs, foods, or substances. Tell your doctor about the allergy and what signs you had.
- If you have any of these health problems: High blood pressure or toxemia.
- If you are in labor or at risk for a miscarriage.
• If you have not had your baby.
• If you are taking certain drugs to treat HIV.
• If you are breast-feeding. Do not breast-feed while you take this drug.

This is not a list of all drugs or health problems that interact with this drug.

Tell your doctor and pharmacist about all of your drugs (prescription or OTC, natural products, vitamins) and health problems. You must check to make sure that it is safe for you to take this drug with all of your drugs and health problems. Do not start, stop, or change the dose of any drug without checking with your doctor.

What are some things I need to know or do while I take this drug?

• Tell all of your health care providers that you take this drug. This includes your doctors, nurses, pharmacists, and dentists.

What are some side effects that I need to call my doctor about right away?

WARNING/CAUTION: Even though it may be rare, some people may have very bad and sometimes deadly side effects when taking a drug. Tell your doctor or get medical help right away if you have any of the following signs or symptoms that may be related to a very bad side effect:

• Signs of an allergic reaction, like rash; hives; itching; red, swollen, blistered, or peeling skin with or without fever; wheezing; tightness in the chest or throat; trouble breathing, swallowing, or talking; unusual hoarseness; or swelling of the mouth, face, lips, tongue, or throat.

• Signs of high blood pressure like very bad headache or dizziness, passing out, or change in eyesight.

• Chest pain or pressure.

• Hallucinations (seeing or hearing things that are not there).

• A heartbeat that does not feel normal.
• Slow heartbeat.
• Shortness of breath.
• Any skin change.
• Ringing in ears.
• Blood in the urine.

**What are some other side effects of this drug?**

All drugs may cause side effects. However, many people have no side effects or only have minor side effects. Call your doctor or get medical help if any of these side effects or any other side effects bother you or do not go away:

• Dizziness or headache.
• Upset stomach or throwing up.
• Stomach pain or diarrhea.
• Bad taste in your mouth.
• Stuffy nose.
• Sweating a lot.
• Irritation where this drug is given.

These are not all of the side effects that may occur. If you have questions about side effects, call your doctor. Call your doctor for medical advice about side effects.

You may report side effects to your national health agency.

You may report side effects to the FDA at 1-800-332-1088. You may also report side effects at [https://www.fda.gov/medwatch](https://www.fda.gov/medwatch).

**How is this drug best taken?**

Use this drug as ordered by your doctor. Read all information given to you. Follow all instructions closely.
• This drug is most often given as a shot into a muscle.
• Rarely, it will be given into a vein.

What do I do if I miss a dose?
• This drug will be given on an as needed basis in a health care setting.

How do I store and/or throw out this drug?
• This injection will be given to you in a healthcare setting. You will not store it at home.

General drug facts
• If your symptoms or health problems do not get better or if they become worse, call your doctor.
• Do not share your drugs with others and do not take anyone else’s drugs.
• Keep all drugs in a safe place. Keep all drugs out of the reach of children and pets.
• Throw away unused or expired drugs. Do not flush down a toilet or pour down a drain unless you are told to do so. Check with your pharmacist if you have questions about the best way to throw out drugs. There may be drug take-back programs in your area.
• Some drugs may have another patient information leaflet. If you have any questions about this drug, please talk with your doctor, nurse, pharmacist, or other health care provider.

If you think there has been an overdose, call your poison control center or get medical care right away. Be ready to tell or show what was taken, how much, and when it happened.
