

Food Sources of Fiber

This information lists foods that contain fiber, the serving size for each food, and the amount of fiber per serving.

About Fiber

Fiber is an important part of your diet because it can help you:

- Have regular bowel movements (poop) and prevent constipation (having fewer bowel movements than usual).
- Lower your cholesterol (a waxy type of fat your body makes).
- Lower your risk for health issues, such as diabetes, heart disease, and obesity (having a high, unhealthy amount of body fat).

Plant-based foods are the best sources of fiber. Fruits, vegetables, whole grains, cereals, legumes (such as kidney and black beans), nuts, and seeds can provide you with the fiber you need.

Before adding more fiber into your diet, talk with your healthcare provider about the amount that's right for you. Your fiber needs are based on your daily caloric need (number of calories your body needs in a day). Females usually need about 25 grams of fiber per day and males need about 35 grams of fiber per day.

Use this chart to choose foods that are good sources of fiber.

Amount of Fiber Per Serving	Food	Serving Size
7 or more grams	Avocado	1 medium
	Artichoke	1 medium
	Dried coconut, shredded	1 cup
	Dried figs	10
	Dried peaches	10
	Raspberries or blackberries, fresh	1 cup
	Green and yellow split peas, cooked	1/2 cup
	Almonds, whole	1/2 cup
	All Bran® Cereal	1/2 cup
	Kashi® GO LEAN® Crunch Cereal	3/4 cup
	Fiber One® Cereal	1/2 cup
	Chickpeas (garbanzo beans)	2/3 cup
	Lentils, cooked	1/2 cup
	Mung beans, boiled	1/2 cup
