Special; Furosemide Special Injection; Lasix; Lasix Special;
PMS-Furosemide; Teva-Furosemide

Warning

• This drug is a strong fluid-lowering drug (diuretic). Sometimes too much water and major elements (potassium) in the blood may be lost. This can lead to serious health problems. The doctor will follow your child closely to change the dose to match your child’s body’s needs.

What is this drug used for?

• It is used to get rid of extra fluid.
• It is used to treat high blood pressure.

What do I need to tell the doctor BEFORE my child takes this drug?

• If your child has an allergy to this drug or any part of this
drug.

- If your child is allergic to any drugs like this one or any other drugs, foods, or other substances. Tell the doctor about the allergy and what signs your child had, like rash; hives; itching; shortness of breath; wheezing; cough; swelling of face, lips, tongue, or throat; or any other signs.

- If your child is not able to pass urine.

- If your child is taking any of these drugs: Chloral hydrate, ethacrynic acid, or lithium.

This is not a list of all drugs or health problems that interact with this drug.

Tell the doctor and pharmacist about all of your child’s drugs (prescription or OTC, natural products, vitamins) and health problems. You must check to make sure that it is safe for your child to take this drug with all of his/her drugs and health problems. Do not start, stop, or change the dose of any drug your child takes without checking with the doctor.

**What are some things I need to know or do while my child takes this drug?**

- Tell all of your child’s health care providers that your child is taking this drug. This includes your child’s doctors, nurses, pharmacists, and dentists.

- Have your child avoid tasks or actions that call for alertness until you see how this drug affects your child. These are things like riding a bike, playing sports, or using items such
as scissors, lawnmowers, electric scooters, toy cars, or motorized vehicles.

- To lower the chance of feeling dizzy or passing out, have your child rise slowly if your child has been sitting or lying down. Have your child be careful going up and down stairs.

- If your child has high blood sugar (diabetes), you will need to watch his/her blood sugar closely.

- If your child is on a low-salt or salt-free diet, talk with your child’s doctor.

- If your child is taking this drug and has high blood pressure, talk with the doctor before giving OTC products that may raise blood pressure. These include cough or cold drugs, diet pills, stimulants, ibuprofen or like products, and some natural products or aids.

- Have your child’s blood pressure checked often. Talk with your child’s doctor.

- Have blood work checked as you have been told by the doctor. Talk with the doctor.

- High cholesterol has happened with this drug. If you have questions, talk with the doctor.

- Your child may need extra potassium. Talk with the doctor.

- Talk with the doctor before giving your child other drugs and natural products that may slow your child’s actions.

- Alcohol may interact with this drug. Be sure your child does not drink alcohol.
- This drug may make your child sunburn more easily. Use care if your child will be in the sun. Tell your child’s doctor if your child sunburns easily while taking this drug.

- Watch for gout attacks.

- If your child has lupus, this drug can make your child’s lupus active or get worse. Tell the doctor right away if your child gets any new or worse signs.

- Use with care in children. Talk with the doctor.

If your child is pregnant or breast-feeding a baby:

- Talk with the doctor if your child is pregnant, becomes pregnant, or is breast-feeding a baby. You will need to talk about the benefits and risks of using this drug.

What are some side effects that I need to call my child’s doctor about right away?

**WARNING/CAUTION:** Even though it may be rare, some people may have very bad and sometimes deadly side effects when taking a drug. Tell your child’s doctor or get medical help right away if your child has any of the following signs or symptoms that may be related to a very bad side effect:

- Signs of an allergic reaction, like rash; hives; itching; red, swollen, blistered, or peeling skin with or without fever; wheezing; tightness in the chest or throat; trouble breathing, swallowing, or talking; unusual hoarseness; or swelling of the mouth, face, lips, tongue, or throat.
• Signs of fluid and electrolyte problems like mood changes, confusion, muscle pain or weakness, a heartbeat that does not feel normal, very bad dizziness or passing out, fast heartbeat, more thirst, seizures, feeling very tired or weak, not hungry, unable to pass urine or change in the amount of urine produced, dry mouth, dry eyes, or very bad upset stomach or throwing up.

• Signs of high blood sugar like confusion, feeling sleepy, more thirst, more hungry, passing urine more often, flushing, fast breathing, or breath that smells like fruit.

• Signs of liver problems like dark urine, feeling tired, not hungry, upset stomach or stomach pain, light-colored stools, throwing up, or yellow skin or eyes.

• Signs of kidney problems like unable to pass urine, change in how much urine is passed, blood in the urine, or a big weight gain.

• Signs of a pancreas problem (pancreatitis) like very bad stomach pain, very bad back pain, or very bad upset stomach or throwing up.

• Very bad dizziness or passing out.

• A burning, numbness, or tingling feeling that is not normal.

• Blurred eyesight.

• Restlessness.

• Hearing problems like lowered hearing and loss of hearing have happened with this drug. Sometimes this may go away
but sometimes it may not. Call the doctor right away if your child has ringing in the ears or any change in hearing.

- Low blood cell counts have happened with this drug. If blood cell counts get very low, this can lead to bleeding problems, infections, or anemia. Call your child’s doctor right away if your child has signs of infection like fever, chills, or sore throat; any unexplained bruising or bleeding; or if your child feels very tired or weak.

What are some other side effects of this drug?
All drugs may cause side effects. However, many people have no side effects or only have minor side effects. Call your child’s doctor or get medical help if any of these side effects or any other side effects bother your child or do not go away:

- Dizziness.
- Headache.
- Constipation.
- Diarrhea.
- Upset stomach or throwing up.
- Not hungry.
- Stomach cramps.

These are not all of the side effects that may occur. If you have questions about side effects, call your child’s doctor. Call your child’s doctor for medical advice about side effects.
You may report side effects to your national health agency.

**How is this drug best given?**

Give this drug as ordered by your child’s doctor. Read all information given to you. Follow all instructions closely.

**All oral products:**

- This drug may cause your child to pass urine more often. To keep your child from having sleep problems, try to give this drug before 6 PM.

- To gain the most benefit, do not miss giving your child doses.

- Do not give sucralfate within 2 hours before or after giving this drug.

- Do not give if product changes color.

**Liquid (solution):**

- Measure liquid doses carefully. Use the measuring device that comes with this drug. If there is none, ask the pharmacist for a device to measure this drug.

**Injection:**

- It is given as a shot into a muscle or vein.

**What do I do if my child misses a dose?**

**All oral products:**

- Give a missed dose as soon as you think about it.
• If it is close to the time for your child’s next dose, skip the missed dose and go back to your child’s normal time.
• Do not give 2 doses at the same time or extra doses.

Injection:
• Call your child’s doctor to find out what to do.

How do I store and/or throw out this drug?

All oral products:
• Store at room temperature.
• Protect from light.
• Store in a dry place. Do not store in a bathroom.

Liquid (solution):
• Do not freeze.

Injection:
• If you need to store this drug at home, talk with your child’s doctor, nurse, or pharmacist about how to store it.

All products:
• Keep all drugs in a safe place. Keep all drugs out of the reach of children and pets.
• Throw away unused or expired drugs. Do not flush down a toilet or pour down a drain unless you are told to do so. Check with your pharmacist if you have questions about the
best way to throw out drugs. There may be drug take-back programs in your area.

General drug facts

- If your child’s symptoms or health problems do not get better or if they become worse, call your child’s doctor.
- Do not share your child’s drug with others and do not give anyone else’s drug to your child.
- Keep a list of all your child’s drugs (prescription, natural products, vitamins, OTC) with you. Give this list to your child’s doctor.
- Talk with your child’s doctor before giving your child any new drug, including prescription or OTC, natural products, or vitamins.
- Some drugs may have another patient information leaflet. If you have any questions about this drug, please talk with your child’s doctor, nurse, pharmacist, or other health care provider.
- If you think there has been an overdose, call your poison control center or get medical care right away. Be ready to tell or show what was taken, how much, and when it happened.
