Hospital Care on Long Island for Memorial Sloan Kettering Patients

Memorial Sloan Kettering (MSK) and New York Cancer & Blood Specialists (NYCBS) have partnered to make it easier for Long Island patients to get inpatient care on Long Island, close to home.

You can get inpatient care at hospitals on Long Island as an MSK patient if:

- You have urgent symptoms
- You need to be admitted to a hospital

When your MSK healthcare provider tells you to go to a Long Island hospital, they'll let the team at NYCBS know that you're an MSK patient.

During your hospital stay on Long Island, you'll be under the care of an oncologist (cancer doctor) from the cancer specialists at NYCBS. Your care teams at MSK and NYCBS will share important health information and talk daily to coordinate your care during your hospital stay on Long Island.

After your hospital stay, you'll once again be in the care of your MSK healthcare provider.

Inpatient care through this partnership is available at these hospitals:

Suffolk County

- Stony Brook University Hospital
- Good Samaritan Hospital Medical Center
- Huntington Hospital

- Long Island Community Hospital (formerly Brookhaven Hospital)
- Mather Hospital
- Peconic Bay Medical Center
- Southside Hospital
- St. Catherine of Siena Medical Center
- St. Charles Hospital
- Stony Brook Eastern Long Island Hospital
- Stony Brook Southampton Hospital

Nassau County

- Long Island Jewish Medical Center (New Hyde Park)
- North Shore University Hospital (Manhasset)
- St. Francis Hospital

If you have any questions, contact a member of your healthcare team directly. If you're a patient at MSK and you need to reach a provider after 5:00 PM, during the weekend, or on a holiday, call 212-639-2000.
