

PATIENT & CAREGIVER EDUCATION

Lobular Breast Cancer Program Luncheon

You're invited to a special educational luncheon hosted by MSK's Lobular Breast Cancer Program.

The co-directors of the Lobular Breast Cancer Program, Dr. Sherry Shen, Dr. Pareja will discuss advances in research, monitoring & surveillance, and managing of the side effects of treatment. The co-directors will also conduct a Q&A to answer your questions.

You'll also hear from a fellow lobular breast cancer patient who has completed treatment about her experiences.

Speakers will be followed by lunch with fellow patients and an opportunity to meet and connect with those going through similar experiences.

Enjoy an afternoon of education and community!
