

## PATIENT & CAREGIVER EDUCATION

# Dicyclomine

This information from Lexicomp® explains what you need to know about this medication, including what it's used for, how to take it, its side effects, and when to call your healthcare provider.

### **Brand Names: US**

Bentyl

### **Brand Names: Canada**

JAMP-Dicyclomine HCl; Protylol [DSC]; RIVA-Dicyclomine

### **What is this drug used for?**

- It is used to treat GI (gastrointestinal) spasms.
- It is used to treat irritable bowel syndrome.

### **What do I need to tell my doctor BEFORE I take this drug?**

#### **For all patients taking this drug:**

- If you are allergic to this drug; any part of this drug; or any other drugs, foods, or substances. Tell your

doctor about the allergy and what signs you had.

- If you have any of these health problems: Bowel block, heart problems due to bleeding, glaucoma, myasthenia gravis, reflux esophagitis, slow moving GI (gastrointestinal tract), trouble passing urine, or very bad ulcerative colitis.
- If you are breast-feeding. Do not breast-feed while you take this drug.

### **Children:**

- If your child is younger than 6 months of age. Do not give this drug to an infant younger than 6 months of age.

This is not a list of all drugs or health problems that interact with this drug.

Tell your doctor and pharmacist about all of your drugs (prescription or OTC, natural products, vitamins) and health problems. You must check to make sure that it is safe for you to take this drug with all of your drugs and health problems. Do not start, stop, or change the dose of any drug without checking with your doctor.

## **What are some things I need to know or do while I take this drug?**

- Tell all of your health care providers that you take this drug. This includes your doctors, nurses, pharmacists, and dentists.
- Avoid driving and doing other tasks or actions that call for you to be alert or have clear eyesight until you see how this drug affects you.
- Talk with your doctor before you use alcohol, marijuana or other forms of cannabis, or prescription or OTC drugs that may slow your actions.
- Bright lights may bother you. Wear sunglasses.
- Be careful in hot weather or while being active. Drink lots of fluids to stop fluid loss.
- If you are 65 or older, use this drug with care. You could have more side effects.
- Tell your doctor if you are pregnant or plan on getting pregnant. You will need to talk about the benefits and risks of using this drug while you are pregnant.

## **What are some side effects that I need to call my doctor about right away?**

**WARNING/CAUTION:** Even though it may be rare, some people may have very bad and sometimes deadly

side effects when taking a drug. Tell your doctor or get medical help right away if you have any of the following signs or symptoms that may be related to a very bad side effect:

- Signs of an allergic reaction, like rash; hives; itching; red, swollen, blistered, or peeling skin with or without fever; wheezing; tightness in the chest or throat; trouble breathing, swallowing, or talking; unusual hoarseness; or swelling of the mouth, face, lips, tongue, or throat.
- Fever.
- Not sweating during activities or in warm temperatures.
- Very bad dizziness or passing out.
- Feeling confused.
- Trouble swallowing or speaking.
- Change in balance.
- Change in eyesight.
- Larger pupils.
- If bright lights bother your eyes.
- Trouble passing urine.
- Diarrhea.

- Fast, slow, or abnormal heartbeat.
- Hallucinations (seeing or hearing things that are not there).
- Memory problems or loss.
- Mood changes.

### **What are some other side effects of this drug?**

All drugs may cause side effects. However, many people have no side effects or only have minor side effects. Call your doctor or get medical help if any of these side effects or any other side effects bother you or do not go away:

- Feeling dizzy, sleepy, tired, or weak.
- Blurred eyesight.
- Upset stomach.
- Feeling nervous and excitable.
- Dry mouth.
- Unusual thirst.
- Dry skin.
- Flushing.
- Trouble sleeping.
- Constipation.

These are not all of the side effects that may occur. If you have questions about side effects, call your doctor. Call your doctor for medical advice about side effects.

You may report side effects to your national health agency.

You may report side effects to the FDA at 1-800-332-1088. You may also report side effects at <https://www.fda.gov/medwatch>.

### **How is this drug best taken?**

Use this drug as ordered by your doctor. Read all information given to you. Follow all instructions closely.

### **All oral products:**

- Take with or without food.
- Do not take antacids at the same time as this drug. Talk with your doctor.

### **Oral liquid:**

- Measure liquid doses carefully. Use the measuring device that comes with this drug. If there is none, ask the pharmacist for a device to measure this drug.

## **Injection:**

- It is given as a shot into a muscle.

## **What do I do if I miss a dose?**

### **All oral products:**

- Take a missed dose as soon as you think about it.
- If it is close to the time for your next dose, skip the missed dose and go back to your normal time.
- Do not take 2 doses at the same time or extra doses.

## **Injection:**

- Call your doctor to find out what to do.

## **How do I store and/or throw out this drug?**

### **All oral products:**

- Store at room temperature in a dry place. Do not store in a bathroom.
- Protect from heat.

### **Tablets and capsules:**

- Keep out of direct sunlight.

## **Injection:**

- If you need to store this drug at home, talk with your doctor, nurse, or pharmacist about how to store it.

## **All products:**

- Keep all drugs in a safe place. Keep all drugs out of the reach of children and pets.
- Throw away unused or expired drugs. Do not flush down a toilet or pour down a drain unless you are told to do so. Check with your pharmacist if you have questions about the best way to throw out drugs. There may be drug take-back programs in your area.

## **General drug facts**

- If your symptoms or health problems do not get better or if they become worse, call your doctor.
- Do not share your drugs with others and do not take anyone else's drugs.
- Some drugs may have another patient information leaflet. If you have any questions about this drug, please talk with your doctor, nurse, pharmacist, or other health care provider.
- Some drugs may have another patient information leaflet. Check with your pharmacist. If you have any questions about this drug, please talk with your doctor, nurse, pharmacist, or other health care provider.
- If you think there has been an overdose, call your

poison control center or get medical care right away. Be ready to tell or show what was taken, how much, and when it happened.
