

PATIENT & CAREGIVER EDUCATION

Mometasone (Nasal)

This information from UpToDate® Lexidrug™ explains what you need to know about this medication, including what it's used for, how to take it, its side effects, and when to call your healthcare provider.

Brand Names: US

Nasonex; Sinuva

Brand Names: Canada

APO-Mometasone; Mosaspray [DSC]; Nasonex; SANDOZ Mometasone; TEVA-Mometasone

What is this drug used for?

- It is used to treat and prevent allergy signs.
- It is used to treat nose polyps.

What do I need to tell my doctor BEFORE I take this drug?

- If you are allergic to this drug; any part of this drug; or any other drugs, foods, or substances. Tell your doctor about the allergy and what signs you had.
- If you have had any recent nose surgery, injury, ulcers, or sores.

This is not a list of all drugs or health problems that interact with this drug.

Tell your doctor and pharmacist about all of your drugs (prescription or OTC, natural products, vitamins) and health problems. You must check to make sure that it is safe for you to take this drug with all of your drugs and health problems. Do not start, stop, or change the dose of any drug without checking

with your doctor.

What are some things I need to know or do while I take this drug?

All products:

- Tell all of your health care providers that you take this drug. This includes your doctors, nurses, pharmacists, and dentists.
- You may have more chance of getting an infection. Wash hands often. Stay away from people with infections, colds, or flu.
- Chickenpox and measles can be very bad or even deadly in some people taking steroid drugs like this drug. Avoid being near anyone with chickenpox or measles if you have not had these health problems before. If you have been exposed to chickenpox or measles, talk with your doctor.
- This drug may raise the chance of cataracts or glaucoma. Talk with the doctor.
- Have an eye exam as you have been told by your doctor.
- This drug may affect growth in children and teens in some cases. They may need regular growth checks. Talk with the doctor.
- Tell your doctor if you are pregnant, plan on getting pregnant, or are breast-feeding. You will need to talk about the benefits and risks to you and the baby.

Implant:

- The implant softens over time. It may come out of the nose by itself or with sneezing or blowing the nose. If you have questions, talk with your doctor.

What are some side effects that I need to call my doctor about right away?

WARNING/CAUTION: Even though it may be rare, some people may have very bad and sometimes deadly side effects when taking a drug. Tell your doctor or get medical help right away if you have any of the following signs or symptoms

that may be related to a very bad side effect:

All products:

- Signs of an allergic reaction, like rash; hives; itching; red, swollen, blistered, or peeling skin with or without fever; wheezing; tightness in the chest or throat; trouble breathing, swallowing, or talking; unusual hoarseness; or swelling of the mouth, face, lips, tongue, or throat.
- Signs of infection like fever, chills, very bad sore throat, ear or sinus pain, cough, more sputum or change in color of sputum, pain with passing urine, mouth sores, or wound that will not heal.
- Signs of a weak adrenal gland like a severe upset stomach or throwing up, severe dizziness or passing out, muscle weakness, feeling very tired, mood changes, decreased appetite, or weight loss.
- Nose sores.
- Nose pain.
- Whistling sound when you breathe.
- Redness or white patches in mouth or throat.
- Change in eyesight.

Nose spray:

- Painful periods.

Implant:

- Irritation or choking feeling in the back of the throat.

What are some other side effects of this drug?

All drugs may cause side effects. However, many people have no side effects or only have minor side effects. Call your doctor or get medical help if any of these side effects or any other side effects bother you or do not go away:

All products:

- Headache.
- Nose or throat irritation.
- Nosebleed.
- Signs of a common cold.

Nose spray:

- Cough.
- Muscle pain.

These are not all of the side effects that may occur. If you have questions about side effects, call your doctor. Call your doctor for medical advice about side effects.

You may report side effects to your national health agency.

You may report side effects to the FDA at 1-800-332-1088. You may also report side effects at <https://www.fda.gov/medwatch>.

How is this drug best taken?

Use this drug as ordered by your doctor. Read all information given to you. Follow all instructions closely.

Nose spray:

- Use as you have been told, even if your signs get better.
- Do not take this drug by mouth. Use in your nose only. Keep out of your mouth and eyes (may burn).
- It may take 2 weeks to see the full effect.
- Shake well before use.
- Prime pump before first use by spraying it 10 times or until you see a fine mist. If the pump is not used for more than 1 week, prime again by spraying 2

times or until you see a fine mist.

- Blow your nose before use.
- Spray up the nose only. Do not spray onto the wall joining the two nostrils.
- Clean the spray tip as you have been told or read the package insert.

Implant:

- It is put in as an implant in the sinus.

What do I do if I miss a dose?

Nose spray:

- Use a missed dose as soon as you think about it.
- If it is close to the time for your next dose, skip the missed dose and go back to your normal time.
- Do not use 2 doses at the same time or extra doses.

Implant:

- Call your health care provider for an appointment.

How do I store and/or throw out this drug?

Nose spray:

- Store spray at room temperature. Throw away any part not used after labeled number of doses are used.
- Protect from light.
- Be sure you know how long you can store this drug before you need to throw it away. Check the storage information that comes with this drug. If you have questions, check with your pharmacist.

Implant:

- This drug will be given in a hospital or doctor's office. You will not store it at home.

All products:

- Keep all drugs in a safe place. Keep all drugs out of the reach of children and pets.
- Throw away unused or expired drugs. Do not flush down a toilet or pour down a drain unless you are told to do so. Check with your pharmacist if you have questions about the best way to throw out drugs. There may be drug take-back programs in your area.

General drug facts

- If your symptoms or health problems do not get better or if they become worse, call your doctor.
- Do not share your drugs with others and do not take anyone else's drugs.
- Some drugs may have another patient information leaflet. If you have any questions about this drug, please talk with your doctor, nurse, pharmacist, or other health care provider.
- Some drugs may have another patient information leaflet. Check with your pharmacist. If you have any questions about this drug, please talk with your doctor, nurse, pharmacist, or other health care provider.
- If you think there has been an overdose, call your poison control center or get medical care right away. Be ready to tell or show what was taken, how much, and when it happened.
