PATIENT & CAREGIVER EDUCATION

# Sacrosidase

This information from UpToDate® Lexidrug™ explains what you need to know about this medication, including what it's used for, how to take it, its side effects, and when to call your healthcare provider.

## Brand Names: US

Sucraid

## What is this drug used for?

- It is used to treat sucrase deficiency.

## What do I need to tell my doctor BEFORE I take this drug?

- If you are allergic to this drug; any part of this drug; or any other drugs, foods, or substances. Tell your doctor about the allergy and what signs you had.
- If you have a glycerin, papain, or yeast allergy, talk with your doctor.

This drug may interact with other drugs or health problems.

Tell your doctor and pharmacist about all of your drugs (prescription or OTC, natural products, vitamins) and health problems. You must check to make sure that it is safe for you to take this drug with all of your drugs and health problems. Do not start, stop, or change the dose of any drug without checking with your doctor.

## What are some things I need to know or do while I take this drug?

- Tell all of your health care providers that you take this drug. This includes your doctors, nurses, pharmacists, and dentists.
- Allergic reactions have happened with this drug. You will need to be sure that you are near health care providers before you take your first and second doses. If you have questions, talk with your doctor.
- If you have high blood sugar (diabetes), this drug may sometimes raise blood sugar. Talk with your doctor about how to keep your blood sugar under control.
- To avoid symptoms of sucrase deficiency, follow the diet plan that your doctor told you about. You may need to limit the starch in your diet.
- Tell your doctor if you are pregnant, plan on getting pregnant, or are breast-feeding. You will need to talk about the benefits and risks to you and the baby.

## What are some side effects that I need to call my doctor about right away?

**WARNING/CAUTION:** Even though it may be rare, some people may have very bad and sometimes deadly side effects when taking a drug. Tell your doctor or get medical help right away if you have any of the following signs or symptoms that may be related to a very bad side effect:

- Signs of an allergic reaction, like rash; hives; itching; red, swollen, blistered, or peeling skin with or without fever; wheezing; tightness in the chest or throat; trouble breathing, swallowing, or talking; unusual hoarseness; or swelling of the mouth, face, lips, tongue, or throat.

## What are some other side effects of this drug?

All drugs may cause side effects. However, many people have no side effects or only have minor side effects. Call your doctor or get medical help if any of these side effects or any other side effects bother you or do not go away:

- Stomach pain.
- Throwing up.

These are not all of the side effects that may occur. If you have questions about side effects, call your doctor. Call your doctor for medical advice about side effects.

You may report side effects to your national health agency.

You may report side effects to the FDA at 1-800-332-1088. You may also report side effects at <https://www.fda.gov/medwatch>.

## How is this drug best taken?

Use this drug as ordered by your doctor. Read all information given to you. Follow all instructions closely.

### Multi-dose container:

- Take with each meal or snack.
- Measure the dose and mix with cold or room temperature water, milk, or formula. Be sure you know how much liquid to mix with the dose.
- Do not mix or take this drug with fruit juice.
- Do not mix this drug in warm or hot drinks.
- Do not heat or microwave.
- Take about  $\frac{1}{2}$  of the dose at the start of the meal or snack. Take the rest of the dose during the meal or snack.
- Wash and dry the scoop after each use. Do not store it in the bottle.
- Put the cap back on after you are done using your dose.

### Single-dose container:

- Take with each meal or snack.
- Mix contents of container in 4 ounces (120 mL) of cold or room temperature water, milk, or formula. Be sure you know the dose and how to measure it.

- Do not mix or take this drug with fruit juice.
- Do not mix this drug in warm or hot drinks.
- Do not heat or microwave.
- Take about 1/2 of the dose at the start of the meal or snack. Take the rest of the dose during the meal or snack.
- If any of the mixed solution is left after the dose, the mixture may be stored in a refrigerator for up to 24 hours. Throw away any part left over after 24 hours.

## **What do I do if I miss a dose?**

- Skip the missed dose and go back to your normal time.
- Do not take 2 doses at the same time or extra doses.

## **How do I store and/or throw out this drug?**

### **All products:**

- Store in a refrigerator. Do not freeze.
- Protect from heat and light.
- Keep all drugs in a safe place. Keep all drugs out of the reach of children and pets.
- Throw away unused or expired drugs. Do not flush down a toilet or pour down a drain unless you are told to do so. Check with your pharmacist if you have questions about the best way to throw out drugs. There may be drug take-back programs in your area.

### **Multi-dose container:**

- After opening, throw away any part not used after 28 days.

## Single-dose container:

- If needed, a single-use container may be stored at room temperature for up to 72 hours.

## General drug facts

- If your symptoms or health problems do not get better or if they become worse, call your doctor.
- Do not share your drugs with others and do not take anyone else's drugs.
- Some drugs may have another patient information leaflet. If you have any questions about this drug, please talk with your doctor, nurse, pharmacist, or other health care provider.
- Some drugs may have another patient information leaflet. Check with your pharmacist. If you have any questions about this drug, please talk with your doctor, nurse, pharmacist, or other health care provider.
- If you think there has been an overdose, call your poison control center or get medical care right away. Be ready to tell or show what was taken, how much, and when it happened.
