Valbenazine

This information from Lexicomp® explains what you need to know about this medication, including what it’s used for, how to take it, its side effects, and when to call your healthcare provider.

Brand Names: US
Ingrezza

Warning

- This drug may raise the chance of depression and suicidal thoughts or actions in people with Huntington’s disease. If you have ever had depression or suicidal thoughts or actions, talk with your doctor. This drug may not be right for you. People who take this drug must be watched closely. Call your doctor right away if you have signs like depression, nervousness, restlessness, grouchiness, panic attacks, or any other changes in feelings, mood, or behavior. Call your doctor right away if you have any thoughts or actions of suicide.

What is this drug used for?

- It is used to treat tardive dyskinesia.
- It is used to treat disabling involuntary movements in Huntington’s chorea.
What do I need to tell my doctor BEFORE I take this drug?

- If you are allergic to this drug; any part of this drug; or any other drugs, foods, or substances. Tell your doctor about the allergy and what signs you had.

- If you have ever had a long QT on ECG or other heartbeat that is not normal.

- If you have taken certain drugs for depression or Parkinson’s disease in the last 14 days. This includes isocarboxazid, phenelzine, tranylcypromine, selegiline, or rasagiline.

- If you are taking any of these drugs: Linezolid or methylene blue.

- If you take any drugs (prescription or OTC, natural products, vitamins) that must not be taken with this drug. This includes rifampin, St. John’s wort, or certain drugs used for seizures. There are many drugs that must not be taken with this drug.

- If you are breast-feeding. Do not breast-feed while you take this drug and for 5 days after your last dose.

This is not a list of all drugs or health problems that interact with this drug.

Tell your doctor and pharmacist about all of your drugs (prescription or OTC, natural products, vitamins) and health problems. You must check to make sure that it is safe for you to take this drug with all of your drugs and health problems. Do not start, stop, or change the dose of any drug without checking with your doctor.

What are some things I need to know or do while I take this drug?

- Tell all of your health care providers that you take this drug. This includes your doctors, nurses, pharmacists, and dentists.

- Avoid driving and doing other tasks or actions that call for you to be alert
until you see how this drug affects you.

- Talk with your doctor before you use alcohol, marijuana or other forms of cannabis, or prescription or OTC drugs that may slow your actions.

- If you have Huntington’s disease, your signs can still get worse while you use drugs like this one. Call your doctor right away if you have any signs that are new or worse.

- This drug may cause harm to the unborn baby if you take it while you are pregnant. If you are pregnant or you get pregnant while taking this drug, call your doctor right away.

What are some side effects that I need to call my doctor about right away?

**WARNING/CAUTION:** Even though it may be rare, some people may have very bad and sometimes deadly side effects when taking a drug. Tell your doctor or get medical help right away if you have any of the following signs or symptoms that may be related to a very bad side effect:

- Signs of an allergic reaction, like rash; hives; itching; red, swollen, blistered, or peeling skin with or without fever; wheezing; tightness in the chest or throat; trouble breathing, swallowing, or talking; unusual hoarseness; or swelling of the mouth, face, lips, tongue, or throat.

- Not able to focus.

- Blurred eyesight.

- Trouble passing urine.

- Slow heartbeat.

- Shortness of breath.

- Dizziness.

- A type of abnormal heartbeat (prolonged QT interval) can happen with this drug. Call your doctor right away if you have a fast heartbeat, a heartbeat that does not feel normal, or if you pass out.

- Signs and symptoms that look like Parkinson’s disease may happen with
this drug. Sometimes this has been severe and needed to be treated in a hospital. Call your doctor right away if you have trouble moving or walking, trouble controlling body movements, shakiness, change in balance or falls, or drooling.

- A very bad and sometimes deadly health problem called neuroleptic malignant syndrome (NMS) may happen. Call your doctor right away if you have any fever, muscle cramps or stiffness, dizziness, very bad headache, confusion, change in thinking, fast heartbeat, heartbeat that does not feel normal, or are sweating a lot.

- Rarely, a severe reaction called angioedema has happened with this drug. This reaction can be deadly. Signs may include swelling of the hands, face, lips, eyes, tongue, or throat; trouble breathing; trouble swallowing; or unusual hoarseness. Get medical help right away if your child has any of these signs.

**What are some other side effects of this drug?**

All drugs may cause side effects. However, many people have no side effects or only have minor side effects. Call your doctor or get medical help if any of these side effects or any other side effects bother you or do not go away:

- Feeling sleepy.
- Feeling tired or weak.
- Dry mouth.
- Constipation.
- Restlessness.
- Trouble sleeping.

These are not all of the side effects that may occur. If you have questions about side effects, call your doctor. Call your doctor for medical advice about side effects.

You may report side effects to your national health agency.

You may report side effects to the FDA at 1-800-332-1088. You may also
report side effects at https://www.fda.gov/medwatch.

**How is this drug best taken?**
Use this drug as ordered by your doctor. Read all information given to you. Follow all instructions closely.

**All products:**

- Take with or without food.
- Keep taking this drug as you have been told by your doctor or other health care provider, even if you feel well.

**Sprinkle capsules:**

- This drug may be swallowed whole with water. Do not crush or chew.
- It may also be opened and sprinkled into a bowl over a small amount (1 tablespoon; 15 mL) of soft food such as applesauce, yogurt, or pudding. Do not sprinkle into milk or drinking water. Stir the drug into the soft food and swallow the mixture right away. Do not crush or chew. Then drink a glass of water (8 ounces; 240 mL).
- If needed, the mixture may be kept at room temperature for up to 2 hours. Throw it away after 2 hours if it has not been taken.
- Do not put this drug down a feeding tube.

**What do I do if I miss a dose?**

- Take a missed dose as soon as you think about it.
- If it is close to the time for your next dose, skip the missed dose and go back to your normal time.
- Do not take 2 doses at the same time or extra doses.
How do I store and/or throw out this drug?
All products:

- Store at room temperature in a dry place. Do not store in a bathroom.
- Keep all drugs in a safe place. Keep all drugs out of the reach of children and pets.
- Throw away unused or expired drugs. Do not flush down a toilet or pour down a drain unless you are told to do so. Check with your pharmacist if you have questions about the best way to throw out drugs. There may be drug take-back programs in your area.

Sprinkle capsules:

- Store in the original container with the lid tightly closed.

General drug facts

- If your symptoms or health problems do not get better or if they become worse, call your doctor.
- Do not share your drugs with others and do not take anyone else’s drugs.
- Some drugs may have another patient information leaflet. If you have any questions about this drug, please talk with your doctor, nurse, pharmacist, or other health care provider.
- This drug comes with an extra patient fact sheet called a Medication Guide. Read it with care. Read it again each time this drug is refilled. If you have any questions about this drug, please talk with the doctor, pharmacist, or other health care provider.
- If you think there has been an overdose, call your poison control center or get medical care right away. Be ready to tell or show what was taken, how much, and when it happened.
