Oxandrolone

This information from Lexicomp® explains what you need to know about this medication, including what it’s used for, how to take it, its side effects, and when to call your healthcare provider.

**Brand Names: US**
Oxandrin [DSC]

**Warning**

- Liver and spleen problems have happened with drugs like this one. Sometimes, these have been very bad or deadly. Signs may not happen until these problems become very bad. Call the doctor right away if your child has signs of liver or spleen problems like dark urine, feeling tired, not hungry, upset stomach or stomach pain, throwing up, or yellow skin or eyes.

- Cholesterol levels may change with the use of drugs like this one. This may raise the chance of heart disease. Talk with the doctor.

**What is this drug used for?**

- It is used to help your child gain weight.

- It may be given to your child for other reasons. Talk with the
doctor.

What do I need to tell the doctor BEFORE my child takes this drug?

- If your child is allergic to this drug; any part of this drug; or any other drugs, foods, or substances. Tell the doctor about the allergy and what signs your child had.

- If your child has any of these health problems: Breast cancer, high calcium levels, kidney disease, or prostate cancer.

If your child is pregnant:

- Do not give this drug to your child if she is pregnant.

If your child is breast-feeding a baby:

- Talk with the doctor if your child is breast-feeding a baby or plans to breast-feed a baby.

This is not a list of all drugs or health problems that interact with this drug.

Tell the doctor and pharmacist about all of your child’s drugs (prescription or OTC, natural products, vitamins) and health problems. You must check to make sure that it is safe for your child to take this drug with all of his/her drugs and health problems. Do not start, stop, or change the dose of any drug your child takes without checking with the doctor.
What are some things I need to know or do while my child takes this drug?

- Tell all of your child’s health care providers that your child is taking this drug. This includes your child’s doctors, nurses, pharmacists, and dentists.

- If your child has high blood sugar (diabetes), you will need to watch his/her blood sugar closely.

- Have your child’s blood work checked often. Talk with your child’s doctor.

- This drug may affect certain lab tests. Tell all of your child’s health care providers and lab workers that your child takes this drug.

- This drug is an anabolic steroid. Anabolic steroid drugs have been abused and misused before. Anabolic steroid abuse can lead to dependence and very bad health problems. These health problems include heart or blood vessel problems, stroke, liver problems, and mental or mood problems. Talk with the doctor.

- This drug will not help your child be better at sports.

- Use with care in children. Talk with the doctor.

- This drug may affect growth in children and teens in some cases. They may need regular growth checks. Talk with the doctor.
If your child is or may be sexually active:

- Have your child use birth control to prevent pregnancy while taking this drug.

If your child is pregnant:

- This drug may cause harm to the unborn baby if your child takes it during pregnancy. If your child is pregnant or gets pregnant while taking this drug, call the doctor right away.

What are some side effects that I need to call my child’s doctor about right away?

**WARNING/CAUTION:** Even though it may be rare, some people may have very bad and sometimes deadly side effects when taking a drug. Tell your child’s doctor or get medical help right away if your child has any of the following signs or symptoms that may be related to a very bad side effect:

- Signs of an allergic reaction, like rash; hives; itching; red, swollen, blistered, or peeling skin with or without fever; wheezing; tightness in the chest or throat; trouble breathing, swallowing, or talking; unusual hoarseness; or swelling of the mouth, face, lips, tongue, or throat.

- Signs of high calcium levels like weakness, confusion, feeling tired, headache, upset stomach and throwing up, constipation, or bone pain.

- Pimples (acne).
• Very nervous and excitable.
• Any unexplained bruising or bleeding.
• Shortness of breath, a big weight gain, or swelling in the arms or legs.
• Low mood (depression).
• Bladder irritation.
• Enlarged breasts.
• For males, erections (hard penis) that happen often or that last a long time.
• Change in size or shape of testicles.
• For females, a deep voice, facial hair, or pimples.

If your child has menstrual periods:

• Period (menstrual) changes.

What are some other side effects of this drug?
All drugs may cause side effects. However, many people have no side effects or only have minor side effects. Call your child’s doctor or get medical help if any of these side effects or any other side effects bother your child or do not go away:

• Upset stomach or throwing up.
• Change in color of skin.
• Feeling nervous and excitable.
• Not able to sleep.

**If your child is or may be sexually active:**

• Not able to get or keep an erection.

• Change in sex interest.

These are not all of the side effects that may occur. If you have questions about side effects, call your child’s doctor. Call your child’s doctor for medical advice about side effects.

You may report side effects to your national health agency.

**How is this drug best given?**

Give this drug as ordered by your child’s doctor. Read all information given to you. Follow all instructions closely.

• Keep giving this drug to your child as you have been told by your child’s doctor or other health care provider, even if your child feels well.

**What do I do if my child misses a dose?**

• Give a missed dose as soon as you think about it.

• If it is close to the time for your child’s next dose, skip the missed dose and go back to your child’s normal time.

• Do not give 2 doses at the same time or extra doses.

**How do I store and/or throw out this drug?**
- Store at room temperature.
- Store in a dry place. Do not store in a bathroom.
- Keep all drugs in a safe place. Keep all drugs out of the reach of children and pets.
- Throw away unused or expired drugs. Do not flush down a toilet or pour down a drain unless you are told to do so. Check with your pharmacist if you have questions about the best way to throw out drugs. There may be drug take-back programs in your area.

**General drug facts**

- If your child’s symptoms or health problems do not get better or if they become worse, call your child’s doctor.
- Do not share your child’s drug with others and do not give anyone else’s drug to your child.
- Some drugs may have another patient information leaflet. If you have any questions about this drug, please talk with your child’s doctor, nurse, pharmacist, or other health care provider.
- If you think there has been an overdose, call your poison control center or get medical care right away. Be ready to tell or show what was taken, how much, and when it happened.
