

PATIENT & CAREGIVER EDUCATION

About Your Transesophageal Echocardiogram (TEE)

This information will help you get ready for your transesophageal echocardiogram (TEE) at Memorial Sloan Kettering (MSK).

A TEE is a procedure that uses ultrasound (sound waves) to create moving pictures of your heart. It lets your healthcare provider see how your:

- Heart valves are working
- Heart muscle is moving
- Blood is flowing

A TEE is a diagnostic exam. This means that it's done to help your healthcare provider find a diagnosis (the cause of your illness) and decide on the best treatment plan.

Figure 1. A transesophageal echocardiogram (TEE)

During your TEE, your healthcare provider will place a probe (flexible tube) into your esophagus (food pipe). This will help them get detailed pictures of your heart because your esophagus is directly behind your heart (see Figure 1).

7 Days Before Your Procedure

Ask about your medications

Talk with your healthcare provider about the medications you're taking. If you take insulin or other medications for diabetes, you may need to change the dose before your procedure. This is because you can't eat after midnight on the evening before your procedure.

- If you take metformin (such as Glumetza® or Glucophage®), stop taking it 24 hours (1 day) before your procedure.
- If you take insulin, ask the doctor who prescribes it what dose you should take on the evening before and the morning of your procedure.
- If you take another medication for diabetes, ask the healthcare provider who prescribes it what you should do on the day before and the morning of your procedure.

If you are taking a blood thinner, ask the healthcare provider who prescribed it if you should continue this medication before your procedure.

Get a letter from your healthcare provider, if needed

If you have an automatic implantable cardioverter-defibrillator (AICD), you'll need to get a clearance letter from your cardiologist (heart doctor) before your procedure. A clearance letter is a letter that says you can safely have the procedure.

Arrange for someone to take you home

You must have a responsible care partner take you home after your procedure. A responsible care partner is someone who can help you get home safely. They should be able to contact your care team if they have any concerns. Make sure to plan this before the day of your procedure.

If you don't have a responsible care partner to take you home, call one of the agencies below. They'll send someone to go home with you. There's a charge for this service, and you'll need to provide transportation. It's OK to use a taxi or car service, but you still need a responsible care partner with you.

3 Days Before Your Procedure

An endoscopy nurse will call you a few days before your procedure. They'll review the instructions in this resource with you and ask you questions about your medical history. The nurse will also review your medications and tell you which medications to take the morning of your procedure.

The Day Before Your Procedure

Note the time of your procedure

A staff member from the Admitting Office will call you after 12:00 p.m. the day before your procedure. If you're scheduled for your procedure on a Monday, the staff member will call you the Friday before.

The staff member will tell you what time you should arrive at the hospital for your procedure. They'll also tell you where to go for your procedure. If you don't receive a call by 5:00 p.m. the business day before your procedure, call 212-639-7882.

If you need to cancel your procedure for any reason, call

the healthcare provider who scheduled it for you.

Instructions for eating and drinking: 8 hours before your arrival time

- **Stop eating 8 hours before your arrival time, if you have not already.**
 - Your healthcare provider may tell you to stop eating earlier. If they do, follow their instructions.
- 8 hours before your arrival time, do not eat or drink anything except these clear liquids:
 - Water.
 - Soda.
 - Clear juices, such as lemonade, apple, and cranberry juices. Do not drink orange juice or juices with pulp.
 - Black coffee or tea (without any type of milk or creamer).
 - Sports drinks, such as Gatorade®.
 - ClearFast CF(Preop)® or Ensure® Pre-Surgery clear carbohydrate drink.
 - Gelatin, such as Jell-O®.

You can keep having these until 2 hours before your arrival time.

The Day of Your Procedure

Instructions for drinking: 2 hours before your arrival time

Stop drinking 2 hours before your arrival time. This includes water.

Things to remember

- Take only the medications your healthcare provider told you to take the morning of your procedure. Take them with a few sips of water.
- Don't smoke the day of your procedure.
- Don't put on any lotion, cream, powder, makeup, deodorant, perfume, or cologne.
- Don't wear any metal objects. Remove all jewelry, including any body piercings.
- Leave all valuables, such as credit cards and jewelry, at home.
- If you wear contact lenses, wear your glasses instead.

What to bring

- A list of the medications you take at home, including patches and creams.
- Your rescue inhaler (such as albuterol for asthma), if you have one.
- A case for your glasses.
- Your Health Care Proxy form, if you have completed one.

Where to park

MSK's parking garage is on East 66th Street between York and 1st avenues. If you have questions about prices, call 212-639-2338.

To get to the garage, turn onto East 66th Street from York Avenue. The garage is about a quarter of a block in from York Avenue. It's on the right (north) side of the street. There's a tunnel you can walk through that

P = Parking

M = Memorial Sloan Kettering

connects the garage to the hospital.

There are other parking garages on:

- East 69th Street between 1st and 2nd avenues.
- East 67th Street between York and 1st avenues.
- East 65th Street between 1st and 2nd avenues.

Where to go

Your procedure will take place in the Endoscopy Suite at MSK, located at:

1275 York Avenue (between East 67th and East 68th Streets)

New York, NY 10065

Take the B elevator to the 2nd floor. Turn right and enter the Endoscopy/Surgical Day Hospital Suite through the glass doors.

If you parked in MSK's parking garage on 66th Street and York Avenue, follow the signs to the B elevator.

Take the B elevator to the 2nd floor. Turn right and enter the Endoscopy/Surgical Day Hospital Suite through the glass doors.

What to expect

Once you arrive

Once you arrive, you'll be asked to state and spell your name and date of birth many times. This is for your safety. People with the same or similar names may be having procedures on the same day.

After changing into a hospital gown, you'll meet your nurse. They'll place an intravenous (IV) catheter into one of your veins, usually in your hand or arm. The IV will be used to give you anesthesia (medication to make you sleep) during your procedure. You may also get fluids through the IV before your procedure.

You'll talk with your healthcare provider before your procedure. They'll explain the procedure and answer your questions.

Tell your healthcare provider if you have any of the following:

- You aren't able to swallow liquids or food.
- You've had surgery to your esophagus.
- You've had radiation to your chest, spine, or upper back.
- You're allergic to medications.

During your procedure

When it's time for your procedure, you'll go into the procedure room and be helped onto an exam table. You'll be asked to remove your dentures or false teeth, if you have them. Your healthcare provider will set up equipment to monitor your heart, breathing, and blood pressure. You'll get oxygen through a thin tube that rests below your nose. You'll also get a mouth guard placed over your teeth to protect them. Your healthcare provider may also numb your throat with a spray.

Once you're asleep, your healthcare provider will insert the probe into your mouth and pass it slowly down your esophagus. They'll move it around slightly to take pictures of your heart and blood flow. This takes about 15 minutes.

After Your Procedure

In the recovery room

When you wake up after your procedure, you'll be in the recovery room. Your nurse will continue to monitor your heart, breathing, and blood pressure. Once you're fully awake, your nurse will remove your IV. Your nurse will explain your discharge instructions to you before you go home.

At home

- You may feel soreness in your throat. This will go away in 1 to 2 days. In the meantime, drink plenty of water and use cough drops to soothe your throat.
- Your healthcare provider may give you a prescription for antibiotics. Make sure to take them as directed.
- You may resume your normal activities 24 hours after your procedure.
- Don't drink alcoholic drinks for 24 hours after your procedure.
- Don't smoke for 24 hours after your procedure.
- You may have a little blood in the phlegm (mucus) or saliva that you cough up. If this happens for more than 24 hours or if there is a lot of blood, call your healthcare provider.
- Your results will be ready in 2 to 3 business days (Monday through Friday). Your results will be given to the healthcare provider who sent you for your TEE.

When to Call Your Healthcare Provider

Call your healthcare provider if you have any of the following:

- A fever of 101 °F (38.3 °C) or higher

- Blood in your phlegm or saliva for more than 24 hours after your procedure
- A lot of blood in your phlegm or saliva, such as when you cough

If you have any questions, contact a member of your care team directly. If you're a patient at MSK and you need to reach a provider after 5 p.m., during the weekend, or on a holiday, call 212-639-2000.
