What is this drug used for?

- It is used to treat pimples (acne).
- It is used to get rid of calluses, corns, and warts.
- It is used to treat psoriasis.
- It is used to control seborrheic dermatitis.
- It may be given to you for other reasons. Talk with the doctor.

What do I need to tell my doctor BEFORE I take this drug?

For all uses of this drug:

- If you have an allergy to salicylic acid or any other part of this drug.
- If you are allergic to any drugs like this one, any other drugs, foods, or other substances. Tell your doctor about the allergy and what signs you had, like rash; hives; itching; shortness of breath; wheezing; cough; swelling of face, lips, tongue, or throat; or any other signs.

For calluses, corns, or warts:

- If you have any of these health problems: High blood sugar (diabetes) or poor blood flow.

This is not a list of all drugs or health problems that interact with this drug.

Tell your doctor and pharmacist about all of your drugs (prescription or OTC, natural products, vitamins) and health problems. You must check to make sure that it is safe for you to take this drug with all of your drugs and health problems. Do not start, stop, or change the dose of any drug without checking with your doctor.

What are some things I need to know or do while I take this drug?

For all uses of this drug:

- Tell all of your health care providers that you take this drug. This includes your doctors, nurses, pharmacists, and dentists.

- Certain acne products that contain benzoyl peroxide or salicylic acid can rarely cause very bad and sometimes life-threatening allergic reactions or very bad irritation. Before first use, you may need to follow certain steps to make sure you do not have an allergic reaction. Use this drug as you were told by the doctor or read the package label. Talk with the doctor.

- Do not put on open wounds, cuts, or irritated skin.

- Use care when putting on a large part of the skin or where there are open wounds. Talk with the doctor.

- Do not use this drug on birthmarks, moles, or warts with hair growth; or cervical, genital, or oral warts.

- If you use this drug too often, your skin problem may become worse.

- Use of other skin products while using this drug may cause more irritation.
• Talk with your doctor before you use other drugs or products on your skin.
• Some of these drugs may catch on fire. Do not use near an open flame or while smoking.
• This drug may cause harm if swallowed. If this drug is swallowed, call a doctor or poison control center right away.
• Do not give to children and teenagers who have or are getting better from flu signs, chickenpox, or other viral infections due to the chance of Reye’s syndrome. Reye’s syndrome causes very bad problems to the brain and liver.
• Different brands of this drug may be for use in different ages of children. Talk with the doctor before giving this drug to a child.
• Tell your doctor if you are pregnant or plan on getting pregnant. You will need to talk about the benefits and risks of using this drug while you are pregnant.
• Tell your doctor if you are breast-feeding. You will need to talk about any risks to your baby.

What are some side effects that I need to call my doctor about right away?

WARNING/CAUTION: Even though it may be rare, some people may have very bad and sometimes deadly side effects when taking a drug. Tell your doctor or get medical help right away if you have any of the following signs or symptoms that may be related to a very bad side effect:

• Signs of an allergic reaction, like rash; hives; itching; red, swollen, blistered, or peeling skin with or without fever; wheezing; tightness in the chest or throat; trouble breathing, swallowing, or talking; unusual hoarseness; or swelling of the mouth, face, lips, tongue, or throat.
• Mood changes.
• Fast breathing.
• Upset stomach or throwing up.
• Ringing in ears.
• Hearing loss.
• Dizziness.
• Feeling very tired or weak.
• Diarrhea.
• Very bad skin irritation.

**What are some other side effects of this drug?**

All drugs may cause side effects. However, many people have no side effects or only have minor side effects. Call your doctor or get medical help if any of these side effects or any other side effects bother you or do not go away:

• Skin irritation.
• Dry skin.
• Burning.
• Stinging.
• Peeling.

These are not all of the side effects that may occur. If you have questions about side effects, call your doctor. Call your doctor for medical advice about side effects.

You may report side effects to your national health agency.

**How is this drug best taken?**

Use this drug as ordered by your doctor. Read all information given to you. Follow all instructions closely.

**For all uses of this drug:**

• Do not take this drug by mouth. Use on your skin only. Keep out of your mouth, nose, and eyes (may burn).
• If this drug gets in the eyes, rinse with cool water.
• Clean affected part before use. Make sure to dry well.
• Do not breathe in the vapors.
• Wash your hands before and after use. Do not wash your hands after use if putting this on your hand.
Foam:

- Prime pump before first use.
- Some of these drugs need to be shaken before use. Be sure you know if this product needs to be shaken before using it.
- Put foam on affected part and rub in gently.

For pimples (acne):

Cream, gel, liquid, or lotion:

- Put a thin layer on the affected skin and rub in gently.
- Some of these drugs need to be shaken before use. Be sure you know if this product needs to be shaken before using it.

Pad:

- Use pad to put on a thin layer of salicylic acid to affected part.
- Do not leave pad on skin.

For calluses, corns, or warts:

- You may soak the affected part for 5 minutes.
- You may cover with a thin dressing if told to do so by the doctor.

Gel and liquid:

- Put on affected skin and let dry.

Cream, lotion:

- Put a thin layer on the affected skin and rub in gently.

For psoriasis or seborrheic dermatitis:

Cream, gel, liquid, lotion, and ointment:

- Put a thin layer on the affected skin and rub in gently.
If the product is for use on the scalp, follow how to use as you have been told or read the package insert.

**Shampoo:**

- To use as a shampoo, wet hair and scalp. Lather well and leave on as you have been told. Rinse fully.
- Repeat treatment as you have been told by the doctor.

**Shampoo with gel kit:**

- To use shampoo on the scalp, do **not** wet hair. Put on affected areas using the applicator. Leave on as you have been told. Rinse fully with water. If wanted, you may shampoo the hair with a non-medicated shampoo.
- To use gel on the scalp, put on affected areas using the applicator. Leave on as you have been told. Wash off with medicated shampoo or warm water.
- To use gel on skin, use at bedtime. Soak the area for at least 5 minutes before using this drug. Put on a thin layer and rub in gently. Cover with a dressing as told. Wash off in the morning.

**What do I do if I miss a dose?**

- Put on a missed dose as soon as you think about it.
- If it is close to the time for your next dose, skip the missed dose and go back to your normal time.
- Do not put on 2 doses at the same time or extra doses.

**How do I store and/or throw out this drug?**

**All products:**

- Store at room temperature. Do not freeze.
- Protect from heat or open flame.
- Keep lid tightly closed.
- Keep all drugs in a safe place. Keep all drugs out of the reach of children and pets.
• Throw away unused or expired drugs. Do not flush down a toilet or pour down a drain unless you are told to do so. Check with your pharmacist if you have questions about the best way to throw out drugs. There may be drug take-back programs in your area.

**Foam:**

• Store upright with the cap on.

• Do not puncture.

**General drug facts**

• If your symptoms or health problems do not get better or if they become worse, call your doctor.

• Do not share your drugs with others and do not take anyone else’s drugs.

• Keep a list of all your drugs (prescription, natural products, vitamins, OTC) with you. Give this list to your doctor.

• Talk with the doctor before starting any new drug, including prescription or OTC, natural products, or vitamins.

• Some drugs may have another patient information leaflet. If you have any questions about this drug, please talk with your doctor, nurse, pharmacist, or other health care provider.

• If you think there has been an overdose, call your poison control center or get medical care right away. Be ready to tell or show what was taken, how much, and when it happened.
