

PATIENT & CAREGIVER EDUCATION

Tazarotene

This information from Lexicomp® explains what you need to know about this medication, including what it's used for, how to take it, its side effects, and when to call your healthcare provider.

Brand Names: US

Avage; Fabior; Tazorac

Brand Names: Canada

Tazorac

What is this drug used for?

- It is used to treat pimples (acne).
- It is used to treat plaque psoriasis.
- It is used to lower the number of wrinkles and liver spots.
- It may be given to you for other reasons. Talk with the doctor.

What do I need to tell my doctor BEFORE I take this drug?

- If you have an allergy to tazarotene, vitamin A, or any other part of this drug.
- If you are allergic to any drugs like this one, any other drugs, foods, or other substances. Tell your doctor about the allergy and what signs you had, like rash; hives; itching; shortness of breath; wheezing; cough; swelling of face, lips, tongue, or throat; or any other signs.
- If you are pregnant or may be pregnant. Do not use this drug if you are pregnant.
- If you are able to get pregnant and are not using birth control.
- If you are breast-feeding or plan to breast-feed.

- If you are sunburned.
- If you are taking any drugs that may make your skin more sensitive to light. There are many drugs that can do this. Ask your doctor or pharmacist if you are not sure.
- If you are using any drugs that may cause dry skin. There are many drugs that can do this. Ask your doctor or pharmacist if you are not sure.

This is not a list of all drugs or health problems that interact with this drug.

Tell your doctor and pharmacist about all of your drugs (prescription or OTC, natural products, vitamins) and health problems. You must check to make sure that it is safe for you to take this drug with all of your drugs and health problems. Do not start, stop, or change the dose of any drug without checking with your doctor.

What are some things I need to know or do while I take this drug?

- Tell all of your health care providers that you take this drug. This includes your doctors, nurses, pharmacists, and dentists.
- Follow how to take this drug as you have been told by your doctor. Do not use more than you were told to use.
- Some weather conditions may irritate the skin. Talk with the doctor.
- Skin may look worse before it looks better.
- Talk with your doctor before you use other drugs or products on your skin.
- Use of other skin products while using this drug may cause more irritation.
- You may get sunburned more easily. Avoid sun, sunlamps, and tanning beds. Use sunscreen and wear clothing and eyewear that protects you from the sun.
- This drug may cause harm if swallowed. If this drug is swallowed, call a doctor or poison control center right away.
- If you are able to get pregnant, a pregnancy test will be done to show that you are NOT pregnant before starting this drug. Talk with your doctor.

- This drug may cause harm to the unborn baby if you take it while you are pregnant.
- Use birth control that you can trust to prevent pregnancy while taking this drug.
- If you are pregnant or you get pregnant while taking this drug, call your doctor right away.

What are some side effects that I need to call my doctor about right away?

WARNING/CAUTION: Even though it may be rare, some people may have very bad and sometimes deadly side effects when taking a drug. Tell your doctor or get medical help right away if you have any of the following signs or symptoms that may be related to a very bad side effect:

- Signs of an allergic reaction, like rash; hives; itching; red, swollen, blistered, or peeling skin with or without fever; wheezing; tightness in the chest or throat; trouble breathing, swallowing, or talking; unusual hoarseness; or swelling of the mouth, face, lips, tongue, or throat.
- Skin irritation.
- Itching.
- Burning.
- Redness.
- Peeling.
- Sunburn.
- Swelling.

What are some other side effects of this drug?

All drugs may cause side effects. However, many people have no side effects or only have minor side effects. Call your doctor or get medical help if any of these side effects or any other side effects bother you or do not go away:

- Stinging.
- Dry skin.

These are not all of the side effects that may occur. If you have questions about side effects, call your doctor. Call your doctor for medical advice about side effects.

You may report side effects to your national health agency.

How is this drug best taken?

Use this drug as ordered by your doctor. Read all information given to you. Follow all instructions closely.

All products:

- Do not take this drug by mouth. Use on your skin only. Keep out of your mouth, nose, and eyes (may burn).
- Do not put in the vagina.
- If you get this drug in any of these areas, rinse well with water.
- If you are able to get pregnant, start using this drug during your normal menstrual period.
- Wash your hands before and after use. Do not wash your hands after use if putting this on your hand.
- Clean affected part before use. Make sure to dry well.
- Put a thin layer on the affected skin and rub in gently.
- Do not put on cuts, scrapes, eczema, or damaged skin.
- Do not use coverings (bandages, dressings, make-up) unless told to do so by the doctor.
- Some products are to be used at bedtime. For some products it does not matter. Check with the pharmacist about how to use this drug.
- Practice good skin care and avoid the sun.

Cream, foam, and gel:

- Avoid putting on healthy skin.

Foam:

- Shake well before use.
- Hold upright to use. Do not turn upside down.
- This drug may catch on fire. Do not use near an open flame or while smoking.

What do I do if I miss a dose?

- Skip the missed dose and go back to your normal time.
- Do not put on 2 doses or extra doses.

How do I store and/or throw out this drug?

All products:

- Store at room temperature.
- Store in a dry place. Do not store in a bathroom.
- Keep all drugs in a safe place. Keep all drugs out of the reach of children and pets.
- Throw away unused or expired drugs. Do not flush down a toilet or pour down a drain unless you are told to do so. Check with your pharmacist if you have questions about the best way to throw out drugs. There may be drug take-back programs in your area.

Foam:

- Do not freeze.
- Store upright with the cap on.
- Protect from heat and sunlight. Do not puncture or burn even if it seems empty.

General drug facts

- If your symptoms or health problems do not get better or if they become worse, call your doctor.
- Do not share your drugs with others and do not take anyone else's drugs.
- Keep a list of all your drugs (prescription, natural products, vitamins, OTC) with you. Give this list to your doctor.

- Talk with the doctor before starting any new drug, including prescription or OTC, natural products, or vitamins.
- Some drugs may have another patient information leaflet. If you have any questions about this drug, please talk with your doctor, nurse, pharmacist, or other health care provider.
- If you think there has been an overdose, call your poison control center or get medical care right away. Be ready to tell or show what was taken, how much, and when it happened.
