

PATIENT & CAREGIVER EDUCATION

Young Adult Post-Treatment Support Group

Unexpected emotions and practical concerns commonly arise after treatment is finished, adding to the disruption that cancer can create in a young person's life. Join fellow young adults for a supportive discussion of issues unique to this population, including concerns about careers, dating, fertility, fears of recurrence, changed perspectives and finding a "new normal."

This is an 8-session weekly online group for young adults in their 20s and 30s who are at least 3 months out from treatment. This group is led by oncology social workers. This group will meet for 8 weeks on Thursday at 1pm starting September 24.

Audience

This support group is open to MSK patients Ages 20-39 only.
