FOR THE MEDIA

During your treatment journey, you may experience symptoms from the disease or side effects from therapy that can take a toll on your body. At Memorial Sloan Kettering, we have an array of services that can help make you more comfortable during treatment. Our specialists in integrative medicine, palliative care and pain management, rehabilitation, and dermatologic health services are available to help you manage your symptoms.

## [Rehabilitation Services](#)

MSK's Rehabilitation Medicine Service includes a team of rehabilitation doctors, and occupational and physical therapists. Their mission is to help you feel and function better.

## [Pain Management](#)

Our pain management program ensures that people who have pain are identified as soon as possible and are treated appropriately and effectively.

## [Supportive Care](#)

MSK's supportive care specialists are dedicated to improving your quality of life during and after cancer treatment. You can get supportive care anytime during your treatment. It is not the same as hospice care.

## [Dermatologic Health](#)

Therapies for cancer can affect skin health. We offer evaluation and treatments that can help minimize these side effects.

## [Sexual Health & Fertility](#)

Cancer and its treatment can affect your sexual functioning as well as your ability to have a child naturally. Our specialists in sexual health and fertility preservation are available to help

men and women with these issues.

## [Cognitive Changes from Cancer Treatment](#)

Our neuropsychologists are licensed psychologists who can assess your cognitive skills and symptoms, help clarify the most likely cause of cognitive changes, and make recommendations to improve the difficulties you are experiencing.

## [Integrative Medicine](#)

Our Integrative Medicine and Wellness Service offers a range of wellness therapies that are designed to work together with traditional medical treatments. Visit us today.

## [Care for Older Patients](#)

Memorial Sloan Kettering offers programs and care specifically focused on the needs of older cancer patients. Learn about our programs for medication management, rehabilitation, nutrition, and more.
