FOR THE MEDIA

Endocrinologist Mabel Ryder, surgeon Vivian Strong, and nuclear medicine doctor Jorge Carrasquillo work together as a team to make sure patients with all kinds adrenal tumors get the best care possible.

When you come to us for adrenal tumor treatment, you are coming to a cancer center ranked #1 in the nation for Urology Cancer Care this year by *U.S. News & World Report*. Here at MSK, you will have a team of experts caring for you. Experts from endocrinology, nuclear medicine, surgery, medical

oncology, and interventional radiology collaborate on a personalized treatment plan that takes into account all of your needs.

Treatment will depend on the type of adrenal tumor you have and where it's located. Your doctor may recommend one or several of the following: surgery, hormone therapy, chemotherapy, radionuclide therapy (injection of a radioactive substance into the tumor), or other therapies.

Incidentalomas

Aldosteronomas and Conn
Syndrome

Pheochromocytomas and
Parangliomas

Adrenal Cortex Tumors and Cushing's
Syndrome

Adrenal Cortical Carcinomas
