Medical oncologist Rona Yaeger (right) studies signaling pathways in colorectal cancer.

Hereditary Colorectal Cancer Family Registry

MSK has established a registry for families who are affected by various types of hereditary colorectal cancer syndromes. The registry is allowing researchers to learn more about the genetic causes of colorectal cancer. It is also helping in the development of new ways to prevent, diagnose, and treat cancers of the colon and rectum.

If you enroll in the registry, you'll be asked to complete a questionnaire about your family history of cancer. You may also have blood and tissue samples collected as part of another study. Information from these tests can be combined with data from the questionnaire to learn more about hereditary colorectal cancer syndromes. You may be contacted periodically over the next several years so that researchers can follow up on your health status.

By participating in the MSK Hereditary Colorectal Cancer Registry, you can learn more about your risk for colorectal and other cancers. The registry can also allow you to have increased surveillance if you are at risk. If you have already been diagnosed with a hereditary colorectal cancer syndrome, the registry can keep you up-to-date on new research that may affect your medical care. Our researchers are working on many projects to learn more about these syndromes. Additionally, several other studies may be open to patients enrolled in the registry.

For more information please email registryprotocol01-110@mskcc.org or call 212-639-8278.

Our experts can help determine which clinical trial is right for you, including some of our newly opened clinical trials:

21-246 A Phase I/II Study of REGN7075 plus Cemiplimab Immunotherapy in People with Advanced Solid Tumor Cancers

21-313 A Phase III Study of MRTX849 Combined with Cetuximab versus Chemotherapy in People with KRAS G12C-Mutated Advanced Colorectal Cancer that Continues to Grow

19-288: Neoadjuvant PD-1 blockade in Mismatch Repair-Deficient Solid Tumors

12-289 ICARuS (Intraperitoneal Chemotherapy After cytoReductive Surgery): A Phase II Study of Early Post-Operative Abdominal Chemotherapy versus Heated Abdominal Chemotherapy for Cancers of the Appendix, Colon, or Rectum that Have Spread to the Abdominal Lining

22-438 A Phase II Study Assessing the Addition of Irinotecan to Combination Chemotherapy after Chemoradiation in Patients with Stage II or III Rectal Cancer to Improve the Rate of Complete Response

18-399 A Phase II Study of Pembrolizumab Immunotherapy or Placebo after Surgery in Patients with Solid Tumors Containing Certain Genetic Changes

27 Clinical Trials found

A Phase 1 Study of ART-123 Plus Chemotherapy to Treat Advanced Colorectal Cancer

Diseases: Colorectal Cancer: Colon Cancer, Colorectal Cancer: Rectal Cancer

Locations: New York City, Commack Nonna's Garden Foundation Center, Basking Ridge, Westchester, Monmouth

Who Can Join

Xi Chen

A Phase 1 Study of ELI-002 7P Immunotherapy in People with Digestive Cancers

Diseases: Colorectal Cancer: Colon Cancer, Colorectal Cancer: Rectal Cancer, Hepatobiliary, Hepatobiliary: Pancreatic Cancer, Upper Gastrointestinal, Upper Gastrointestinal: Pancreatic Cancer

Locations: New York City, Commack Nonna's Garden Foundation Center, Basking Ridge, Westchester, Monmouth

Who Can Join

Eileen M. O'Reilly

A Phase 1 Study of SNDX-5613 in People With Advanced Colorectal Cancer and Other Digestive Tumors

Diseases: Colorectal Cancer: Colon Cancer, Colorectal Cancer: Rectal Cancer, Upper Gastrointestinal

Locations: New York City, Commack Nonna's Garden Foundation Center, Basking Ridge, Westchester, Monmouth

Who Can Join

Maliha Nusrat

A Phase 1/2 Study of MRTX1133 in People With Solid Tumors That Have a KRAS G12D Gene Mutation

Diseases: Colorectal Cancer: Colon Cancer, Colorectal Cancer: Rectal Cancer, Hepatobiliary: Pancreatic Cancer, Lung Cancer, Non-Small Cell, Solid Tumors, Upper Gastrointestinal: Pancreatic Cancer

Locations: New York City, Commack Nonna's Garden Foundation Center, Basking Ridge, Westchester, Monmouth

Who Can Join

Yonina R. Murciano-Goroff

A Phase 1/2 Study of VLS-1488 in People With Various Types of Cancer

Diseases: Bladder Cancer, Colorectal Cancer: Colon Cancer, Colorectal Cancer: Rectal Cancer, Head & Neck Cancer, Lung Cancer, Non-Small Cell: Other, Ovarian Cancer, Solid Tumors, Squamous Cell Carcinoma, Upper Gastrointestinal: Esophageal Cancer, Upper Gastrointestinal: Gastric Cancer, Uterine Sarcoma: Carcinosarcoma

Locations: New York City, Commack Nonna's Garden Foundation Center, Basking Ridge, Westchester, Monmouth

Who Can Join

Claire Friedman

A Phase 1a Study of AVA6000 in People with Solid Tumors

Diseases: Bladder Cancer, Breast Cancer, Colorectal Cancer: Colon Cancer, Colorectal Cancer: Rectal Cancer, Head & Neck Cancer, Hepatobiliary, Hepatobiliary: Pancreatic Cancer, Lung Cancer, Non-Small Cell, Ovarian Cancer, Prostate Cancer: Metastatic Disease after Hormone-Reducing Therapy, Sarcomas, Solid Tumors, Upper Gastrointestinal: Esophageal Cancer, Upper Gastrointestinal: Pancreatic Cancer

Locations: New York City, Commack Nonna's Garden Foundation Center, Basking Ridge, Westchester, Monmouth

Who Can Join

William D. Tap

A Phase 2 Study of Botensilimab and Balstilimab Immunotherapy in People with Advanced Colorectal Cancer

Diseases: Colorectal Cancer: Colon Cancer, Colorectal Cancer: Rectal Cancer

Locations: New York City, Commack Nonna's Garden Foundation Center, Basking Ridge, Westchester, Monmouth

Who Can Join

Neil H. Segal

A Phase 2/3 Study of BRAF-Targeted Therapy After Surgery and Chemotherapy for BRAF-Mutated Colon Cancer

Diseases: Colorectal Cancer: Colon Cancer

Locations: New York City, Commack Nonna's Garden Foundation Center, Basking Ridge, Westchester, Monmouth

Who Can Join

Rona Yaeger

A Phase 3 Study Assessing the Addition of Local Therapies to the Usual Chemotherapy for Limited Metastatic Colorectal Cancer: The ERASur Study

Diseases: Colorectal Cancer: Colon Cancer, Colorectal Cancer: Rectal Cancer

Locations: New York City, Commack Nonna's Garden Foundation Center, Basking Ridge, Westchester, Monmouth

Who Can Join

Vonetta M. Williams

A Phase I Study of DS-1062a in People with Advanced Digestive Cancers

Diseases: Colorectal Cancer: Colon Cancer, Colorectal Cancer: Rectal Cancer, Hepatobiliary: Pancreatic Cancer, Upper Gastrointestinal: Esophageal Cancer, Upper Gastrointestinal: Gastric Cancer, Upper Gastrointestinal: Pancreatic Cancer

Locations: New York City, Commack Nonna's Garden Foundation Center, Basking Ridge, Westchester, Monmouth

Who Can Join

Shanu Modi
