This year marks the centennial of the first Head and Neck Cancer Surgery Service in the world, established at Memorial Sloan Kettering in New York City. Memorial Sloan Kettering continues to be at the forefront of developing advanced surgical techniques that preserve function and restore critical organs.

Each year, our head and neck cancer team of more than 45 specialists diagnose and treat more than 3,500 people with oral cancer, laryngeal cancer, pharyngeal (throat) cancer, nasal cavity and paranasal sinus cancers, thyroid cancer, and parathyroid tumors.

Our extraordinary multidisciplinary patient care combines surgery, chemotherapy, and radiation therapy — an approach that often is more effective and less likely to result in side effects.

More Head and Neck Cancer Patient Stories

Larry, an ESPN sportscaster, came to Memorial Sloan Kettering for treatment that would preserve his voice while eliminating his throat cancer.

After being diagnosed with advanced tongue cancer, the recent college graduate Alyssa put her care in the hands of Memorial Sloan Kettering's specialists.

When a biopsy revealed laryngeal cancer, Jose flew across the country from Arizona to New York for radiation therapy at Memorial Sloan Kettering.
