[Give to MSK](#)

Neurosurgeon Nelson Moss is part of a world-renowned team that cares for people with gliomas.

At Memorial Sloan Kettering, we typically use surgery to diagnose as well as treat gliomas. Often a sample of the tumor is removed during surgery and analyzed by a pathologist to help the surgeon decide how much tumor tissue can safely be removed. New technologies have made brain surgery safer than ever before. It is usually the most effective treatment for people with a glioma.

MSK neurosurgeons have vast experience with glioblastomas. Studies suggest that people who have brain surgery have the best outcome when the doctor has done the procedure many times before. MSK neurosurgeons operate on more than 600 people with brain tumors each year — one of the highest numbers of patients cared for in the world.

Postoperative care at MSK, provided by our expert nursing staff, is second to none. Our nurses received [Magnet® recognition](#) in 2016 for their outstanding performance in delivering patient-centered care.

Depending on what's best for you, we may use one of the following approaches and techniques:

Functional MRI Brain Mapping  
+

MRI During Surgery  
+

Surgical Navigation  
+

Awake Surgery  
+

Neuroendoscopy  
+

Glioblastoma Surgery  
+
