FOR THE MEDIA
are constantly thinking of new ways we can improve our patients' experience.

Because our team of doctors' sole focus is melanoma, our care teams have a very high level of expertise. Many of our doctors are leading researchers in the field. We have helped dramatically improve the outlook for people with melanoma through new treatments, such as immunotherapy and targeted therapy.

MSK patients can receive aspects of their care at our locations on Long Island as well as in [Westchester County](#), [New Jersey](#), and [Manhattan](#).

Patients may also be able to have telemedicine visits with our melanoma doctors. [Learn more](#)
