surgery, or radiation therapy.

Sometimes a clinical trial gives you access to new therapies that are not yet available at most hospitals. Talk with your doctor about whether joining a clinical trial is right for you.

Clinical trials are designed to answer questions about:

- Safety
- Benefits
- Side effects
- Whether some people are helped more than others

MSK will start a clinical trial only if our researchers think we can improve methods for cancer:

- Prevention
- Treatment
- Diagnosis
- Screening

For more information, please read [Clinical Trials at MSK: What You Need to Know](#).

Clinical trials to improve treatments for multiple myeloma

MSK is researching new ways to evaluate people with myeloma just when they're diagnosed. We aim to evaluate how they may respond to treatment.

MSK researchers are learning more about the genetics of multiple myeloma. We are using this knowledge to find better drugs to control the disease.

We look for changes (mutations and variants) that can make the cancer worse. MSK has a team of experts in using diagnostic tools, such as DNA sequencing or microarray analysis. A microarray is a lab tool that can analyze thousands of genes at one time.

Through MSK clinical trials, we're exploring the best ways to combine standard chemotherapy drugs with immune-modifying drugs. We also are testing newer immunotherapies and mechanisms of action (how a drug affects the body).

You can search below for the latest list of MSK's clinical trials for multiple myeloma and related plasma cell diseases.

## [A Phase 1 Study of ABBV-453 in People with Recurrent or Persistent Multiple Myeloma](#)

Diseases: [Hematology: Multiple Myeloma](#)

Locations: [New York City](#), [Commack Nonna's Garden Foundation Center](#), [Basking Ridge](#), [Westchester](#), [Monmouth](#)

[Who Can Join](#)

 [Saad Z. Usmani](#)

---

## [A Phase 1 Study of BMS-986453 CAR T Cell Therapy in People With Multiple Myeloma](#)

Diseases: [Hematology: Multiple Myeloma](#)

Locations: [New York City](#), [Commack Nonna's Garden Foundation Center](#), [Basking Ridge](#), [Westchester](#), [Monmouth](#)

[Who Can Join](#)

 [Sham Mailankody](#)

---

## [A Phase 1 Study of CB-011 CAR T Cell Therapy in People With Multiple Myeloma](#)

Diseases: [Hematology: Multiple Myeloma](#)

Locations: [New York City](#), [Commack Nonna's Garden Foundation Center](#), [Basking Ridge](#), [Westchester](#), [Monmouth](#)

[Who Can Join](#)

 [Sham Mailankody](#)

---

## [A Phase 1 Study of CC-92328 Immunotherapy in People with Persistent or Recurrent Multiple Myeloma](#)

Diseases: [Hematology: Multiple Myeloma](#)

Locations: [New York City](#), [Commack Nonna's Garden Foundation Center](#), [Basking Ridge](#), [Westchester](#), [Monmouth](#)

[Who Can Join](#)

 [\\_ Saad Z. Usmani](#)

---

## [A Phase 1 Study of KTX-1001 in People With Multiple Myeloma](#)

Diseases: [Hematology: Multiple Myeloma](#)

Locations: [New York City](#), [Commack Nonna's Garden Foundation Center](#), [Basking Ridge](#), [Westchester](#), [Monmouth](#)

[Who Can Join](#)

 [\\_ Saad Z. Usmani](#)

---

## [A Phase 1/2 Study of BGB-11417 Given Alone and With Carfilzomib and/or Dexamethasone to Treat Multiple Myeloma](#)

Diseases: [Hematology: Multiple Myeloma](#)

Locations: [New York City](#), [Commack Nonna's Garden Foundation Center](#), [Basking Ridge](#), [Westchester](#), [Monmouth](#)

[Who Can Join](#)

 [\\_ Malin Hultcrantz](#)

---

## [A Phase 1b Study of Elranatamab Plus Carfilzomib and Dexamethasone or Elranatamab Plus PF-07901801 in People With Multiple Myeloma](#)

Diseases: [Hematology: Multiple Myeloma](#)

Locations: [New York City](#), [Commack Nonna's Garden Foundation Center](#), [Basking Ridge](#), [Westchester](#), [Monmouth](#)

[Who Can Join](#)

 [\\_ Alexander M. Lesokhin](#)

---

## [A Phase 1b/2 Study of Talquetamab and Teclistamab in People With Multiple Myeloma](#)

Diseases: [Hematology: Multiple Myeloma](#)

Locations: [New York City](#), [Commack Nonna's Garden Foundation Center](#), [Basking Ridge](#), [Westchester](#), [Monmouth](#)

[Who Can Join](#)

 [\\_ Saad Z. Usmani](#)

---

## [A Phase 2 Study of Belantamab Mafodotin in People with Recurrent or Persistent Multiple Myeloma](#)

Diseases: [Hematology: Multiple Myeloma](#)

Locations: [New York City](#), [Commack Nonna's Garden Foundation Center](#), [Basking Ridge](#), [Westchester](#), [Monmouth](#)

[Who Can Join](#)

 [\\_ Malin Hultcrantz](#)

---

## [A Phase 2 Study of Cyclophosphamide, Bortezomib, Dexamethasone, and Daratumumab in People With Monoclonal Gammopathy of Renal Significance](#)

Diseases: [Hematology: Hematologic Disorders](#), [Hematology: Hematologic Malignancies](#), [Hematology: Multiple Myeloma](#)

Locations: [New York City](#), [Commack Nonna's Garden Foundation Center](#), [Basking Ridge](#), [Westchester](#), [Monmouth](#)
