When endometrial (uterine) cancer is discovered in its earliest, most treatable [stages](#) , more than 90 percent of women survive at least five years — and most are completely cured.

At Memorial Sloan Kettering, we know that even after you’ve finished your cancer treatments, you may still need our help. We’re committed to supporting you in every way we can — physically, emotionally, spiritually, and otherwise — for as long as you need us.

Gynecologic Cancer Survivors Support Group

Led by social workers and nurses, we touch on such topics as managing post-treatment side effects, disclosure, follow-up diagnostics, and fear of recurrence. [Visit our calendar](#) for information about upcoming meetings.

We’ve built a program designed for cancer survivors and their families. Our [Adult Survivorship Program](#) has many services for you and your loved ones including support groups, follow-up programs, educational resources, and more.

Plus, our Resources for Life After Cancer program offers individual and family counseling, lectures, support groups, and practical guidance on employment and insurance issues, among other services. Visit the [Adult Survivorship Program](#) to learn more.
