Get to Know Me

I am a physician-scientist and board-certified medical oncologist. At Memorial Sloan Kettering Cancer Center (MSK), I work closely with colleagues across areas, like surgery and radiation oncology, to care for people with [soft tissue](#) and bone sarcomas.

There are many different types of sarcomas. Personalized treatment is important because no two sarcomas are the same. The treatment plans that my colleagues, patients, and I create together are always focused on adjusting care to meet each patient's needs and goals.

What I Do at MSK

I'm a sarcoma medical oncologist, which is a cancer doctor who specializes in sarcoma. This includes bone and soft tissue sarcomas (such as Ewing sarcoma and Liposarcoma) and benign (not cancer) growths that are like sarcoma.

Disclosures

Members of the MSK Community often work with pharmaceutical, device, biotechnology, and life sciences companies, and other organizations outside of MSK, to find safe and effective cancer treatments, to improve patient care, and to educate the health care community. These activities outside of MSK further our mission, provide productive collaborations, and promote the practical application of scientific discoveries.

MSK requires doctors, faculty members, and leaders to report ("disclose") the relationships and financial interests they have with external entities. As a commitment to transparency with our community, we make that information available to the public. Not all disclosed interests and relationships present conflicts of interest. MSK reviews all disclosed interests and relationships to assess whether a conflict of interest exists and whether formal COI management is needed.

Ping Chi discloses the following relationships and financial interests:
