Annual report

Give to MSK

based at the state-of-the-art Evelyn H. Lauder Breast Center, and benefit from close interaction with a team of outstanding clinicians who specialize in the treatment of breast cancer patients. Selective rotations in the departments of surgery, radiology and radiation oncology enhance the understanding of the clinical aspects of breast diseases, and their implications for the practicing pathologist.

How to Apply

Apply Online

Once applicants have submitted their applications, they will need to send the following documents in order to be considered for a fellowship position:

Three letters of recommendation from an institution in which the applicant has trained. Letters should be addressed to Hannah Wen the program director. Please request letter writers add the following line after the heading (RE: Candidates Name, Program & Year Applying to)

CV

Copy of a medical school diploma and translation, if necessary.

International medical school graduates must submit a copy of their Educational Commission for Foreign Medical Graduates (ECFMG) certificate that is marked "valid indefinitely"

Additional Information

Goals and Objectives

Gain experience in the diagnosis of neoplastic diseases of the breast and their mimics.

Gain experience in the diagnosis of precursors of mammary neoplasia.

Gain experience in the diagnosis of non-neoplastic lesions of the breast and their mimics.

Develop an understanding of special techniques for pathologic characterization of diseases of the breast.

Develop an understanding of the clinical features of breast diseases, including diagnostic evaluation of patients, treatment algorithms, tumor staging parameters and prognostic indices.

Develop an appreciation of the multidisciplinary team approach for the treatment of patients with breast disease.

Enhance teaching skills through interaction with pathology, surgery and radiology fellows, students, and clinicians.

Develop appreciation for research methodology and utilize analytical techniques to complete research projects.

Responsibilities

The breast pathology fellows will review slides and prepare reports for selected in-house and submitted consultation cases, with increasing autonomy as the fellowship progresses. Responsibilities also include supervision of trainees, pathologist assistants and rotating visitors and participation in intradepartmental teaching conferences and journal club presentations. The fellows will present cases at the weekly multidisciplinary breast conference, and attend the intradepartmental breast pathology consensus conference and research meetings. The fellows will also participate in activities such as tissue procurement and review of archival pathology cases.

The breast pathology fellows will engage in both independent and collaborative research, select a limited number of primary research projects and pursue them under the guidance of the attending faculty. The fellows will prepare research proposals, participate in and coordinate the completion of projects, compile and analyze the data from these studies, prepare abstracts for

submission to scientific meetings, and compile manuscripts for submission to peer-reviewed scientific journals.

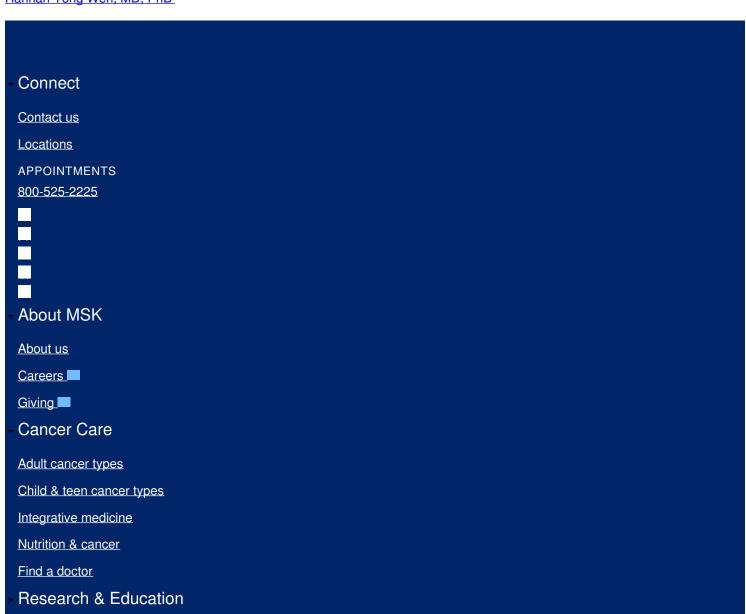

For Further Information

For questions regarding this fellowship please refer to our contact information below. Applications should be submitted no later than September 30 of two years before planned start date at the address listed below and consist of a curriculum vitae and at least three letters of reference.
